ACKNOWLEDGEMENTS

The author expresses her whole-hearted gratitude to Prof. S.N. Sivanandam, Head, Department of Electrical and Electronics Engineering, for seeding this research work and uninterrupted expert guidance throughout the course with lot of enthusiasm.

The author extends her sincere thanks to the Management of PSG College of Technology and to Prof. Radhakrishnan, Principal, for the encouragement and for providing the necessary infrastructure for the execution of this research work.

The author owes much to Prof. S. Rajasekaran and G. A. Vijayalakshmi pai for their excellent help and useful comments.

The author expresses gratefulness to Dr. A. Kandasamy, Dean, Electrical sciences and Dr. A. Shanmugam for their interest shown in the progress of the thesis work. The author feels pertinent in thanking her colleagues and students of EEE department for their excellent active support to carry out this work.

Finally, the author extends whole-hearted thanks to her parents and in-laws, with a special acknowledgement to her brother for their encouragement in the lengthy process. The author is thankful to her child S. Priyanka for the patience in monopolizing the time and schedule. The author expresses complacency to her husband for his unaccountable support in the successful execution of this work.
