LIST OF FIGURES

CHAPTER 1  Introduction  
Fig. 1.1 Physical parameters and molecular structure of Methanol  
Fig. 1.2 Physical parameters and molecular structure of Ethanol  
Fig. 1.3 Physical parameters and molecular structure of Water  

CHAPTER 3  Theories of Dielectrics  
Fig. 3.1 Variation of $\varepsilon'$ and $\varepsilon''$ with frequency in GHz  
Fig. 3.1 Debye Semicircle.  

CHAPTER 4  Experimental Technique and Data Analysis  
Fig. 4.1 TDR Laboratory Setup Photograph  
Fig. 4.2 Geometrical construction of SMA cell  
Fig. 4.3 Fringing Field and SMA cell dimensions  
Fig. 4.4 Constant temperature bath.  
Fig. 4.5 Equivalent circuit of Transmission line  
Fig. 4.6 Response to step pulse.  
Fig. 4.7 Reflection of step pulse from different purely resistive loads.  
Fig. 4.8 Reflection of step pulse from different complex loads.  
Fig. 4.9 Block diagram of dual channel TDR unit  
Fig. 4.10 Reflected step pulse without sample and reflected pulse with sample  
Fig. 4.11 Subtracted pulse $p(t)$ and added pulse $q(t)$  
Fig. 4.12 $p_{(area)}$ and $q_0, q_\infty$ for a sample.  
Fig. 4.13 Plot for determination of effective pin length.  

CHAPTER 5  Complex Systems (Ethanol)  
Fig.AE.5 TDR waveform for Arjunarishta - Ethanol at 35°C  
Fig.AE.2 Complex permittivity spectra for 50% Ethanol in Arjunarishta - Ethanol at 35°C  
Fig.AE.3 Cole-Cole plot for 50% Ethanol in Arjunarishta-Ethanol at 35°C  
Fig.AE.4 Variation of permittivity ($\varepsilon_\infty$) with volume % of Ethanol in Arjunarishta - Ethanol mixture at various temperature  
Fig.AE.5 Variation of $\tau$ with Volume % of Ethanol in Arjunarishta - Ethanol mixture at various temperatures  
Fig.AE.6 Variation of $\sigma$ with concentration of Ethanol in Arjunarishta – Ethanol at various temperatures  
Fig.AE.7 Variation of Excess permittivity of Ethanol in Arjunarishta - Ethanol mixture at various temperatures
Fig.AE.8  Variation of excess inverse relaxation time of Ethanol in Arjunarishta - Ethanol Mixture at various temperatures
Fig.AE.9  Plot of fB with Volume. Fraction of Ethanol in Arjunarishta Ethanol mixture at various temperatures
Fig.AE.10 Arrhenius Plot for Arjunarishta - Ethanol Mixture
Fig.AE.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Arjunarishta - Ethanol Mixture
Fig.AE.12 Variation of free energy of activation for Arjunarishta - Ethanol mixture
Fig.KE.1  TDR waveform for Khadirarishta - Ethanol at 35°C
Fig.KE.2  Complex permittivity spectra for 50% Ethanol in Khadirarishta - Ethanol at 35°C
Fig.KE.3  Cole-Cole plot for 50% Ethanol in Khadirarishta-Ethanol at 35°C
Fig.KE.4  Variation of permittivity (ε₀) with volume % of Ethanol in Khadirarishta - Ethanol mixture at various temperature
Fig.KE.5  Variation of (τ) with Volume % of Ethanol in Khadirarishta - Ethanol mixture at various temperatures
Fig.KE.6  Variation of σ with concentration of Ethanol in Khadirarishta - Ethanol at various temperatures
Fig.KE.7  Variation of Excess permittivity of Ethanol in Khadirarishta - Ethanol mixture at various temperatures
Fig.KE.8  Variation of excess inverse relaxation time of Ethanol in Khadirarishta - Ethanol Mixture at various temperatures
Fig.KE.9  Plot of fB with Volume. Fraction of Ethanol in Khadirarishta Ethanol mixture at various temperatures
Fig.KE.10 Arrhenius Plot for Khadirarishta - Ethanol Mixture
Fig.KE.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Khadirarishta - Ethanol Mixture
Fig.KE.12 Variation of free energy of activation for Khadirarishta - Ethanol mixture
Fig.ME.1  TDR waveform for Mahamanjishthadaryarishta - Ethanol at 35°C
Fig.ME.2  Complex permittivity spectra for 50% Ethanol in Mahamanjishthadaryarishta - Ethanol at 35°C
Fig.ME.3  Cole-Cole plot for 50% Ethanol in Mahamanjishthadaryarishta-Ethanol at 35°C
Fig.ME.4  Variation of permittivity (ε₀) with volume % of Ethanol in Mahamanjishthadaryarishta - Ethanol mixture at various temperature
Fig.ME.5  Variation of (τ) with Volume % of Ethanol in Mahamanjishthadaryarishta - Ethanol mixture at various temperatures
Fig.ME.6  Variation of σ with concentration of Ethanol in Mahamanjishthadaryarishta - Ethanol at various temperatures
Fig.ME.7  Variation of Excess permittivity of Ethanol in Mahamanjishthadaryarishta - Ethanol mixture at various temperatures
Fig.ME.8  Variation of excess inverse relaxation time of Ethanol in Mahamanjishthadharishta - Ethanol Mixture at various temperatures
Fig.ME.9  Plot of fB with Volume. Fraction of Ethanol in Mahamanjishthadharishta Ethanol mixture at various temperatures
Fig.ME.10 Arrhenius Plot for Mahamanjishthadharishta - Ethanol Mixture
Fig.ME.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Mahamanjishthadharishta - Ethanol Mixture
Fig.ME.12 Variation of free energy of activation for Mahamanjishthadharishta - Ethanol mixture
Fig.LE.1  TDR waveform for Lohasava - Ethanol at 35°C
Fig.LE.2  Complex permittivity spectra for 50% Ethanol in Lohasava - Ethanol at 35°C
Fig.LE.3  Cole-Cole plot for 50% Ethanol in Lohasava-Ethanol at 35°C
Fig.LE.4  Variation of permittivity (ε₀) with volume % of Ethanol in Lohasava - Ethanol mixture at various temperatures
Fig.LE.5  Variation of (τ) with Volume % of Ethanol in Lohasava - Ethanol mixture at various temperatures
Fig.LE.6  Variation of σ with concentration of Ethanol in Lohasava – Ethanol at various temperatures
Fig.LE.7  Variation of Excess permittivity of Ethanol in Lohasava - Ethanol mixture at various temperatures
Fig.LE.8  Variation of excess inverse relaxation time of Ethanol in Lohasava - Ethanol Mixture at various temperatures
Fig.LE.9  Plot of fB with Volume. Fraction of Ethanol in Lohasava Ethanol mixture at various temperatures
Fig.LE.10 Arrhenius Plot for Lohasava - Ethanol Mixture
Fig.LE.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Lohasava - Ethanol Mixture
Fig.LE.12 Variation of free energy of activation for Lohasava - Ethanol mixture
Fig.SE.1  TDR waveform for Sarivadyarishta - Ethanol at 35°C
Fig.SE.2  Complex permittivity spectra for 50% Ethanol in Sarivadyarishta - Ethanol at 35°C
Fig.SE.3  Cole-Cole plot for 50% Ethanol in Sarivadyarishta-Ethanol at 35°C
Fig.SE.4  Variation of permittivity (ε₀) with volume % of Ethanol in Sarivadyarishta - Ethanol mixture at various temperature
Fig.SE.5  Variation of (τ) with Volume % of Ethanol in Sarivadyarishta - Ethanol mixture at various temperatures
Fig.SE.6  Variation of σ with concentration of Ethanol in Sarivadyarishta – Ethanol at various temperatures
Fig.SE.7  Variation of Excess permittivity of Ethanol in Sarivadyarishta - Ethanol mixture at various temperatures
Fig.SE.8  Variation of excess inverse relaxation time of Ethanol in Sarivadyarishta - Ethanol Mixture at various temperatures
Fig.SE.9 Plot of fB with Volume. Fraction of Ethanol in Sarivadyarishta Ethanol mixture at various temperatures
Fig.SE.10 Arrhenius Plot for Sarivadyarishta - Ethanol Mixture
Fig.SE.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Sarivadyarishta - Ethanol Mixture
Fig.SE.12 Variation of free energy of activation for Sarivadyarishta - Ethanol mixture

CHAPTER 5 Complex Systems (Methanol)
Fig.AM.1 TDR waveform for Arjunarishta - Methanol at 35°C
Fig.AM.2 Complex permittivity spectra for 50 % Methanol in Arjunarishta - Methanol at 35°C
Fig.AM.3 Cole-Cole plot for 50% Methanol in Arjunarishta-Methanol at 35°C
Fig.AM.4 Variation of permittivity (εr) with volume % of Methanol in Arjunarishta - Methanol mixture at various temperatures
Fig.AM.5 Variation of (τ) with Volume % of Methanol in Arjunarishta - Methanol mixture at various temperatures
Fig.AM.6 Variation of σ with concentration of Methanol in Arjunarishta – Methanol at various temperatures
Fig.AM.7 Variation of Excess permittivity of Methanol in Arjunarishta - Methanol mixture at various temperatures
Fig.AM.8 Variation of excess inverse relaxation time of Methanol in Arjunarishta - Methanol Mixture at various temperatures
Fig.AM.9 Plot of fB with Volume. Fraction of Methanol in Arjunarishta Methanol mixture at various temperatures
Fig.AM.10 Arrhenius Plot for Arjunarishta - Methanol Mixture
Fig.AM.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Arjunarishta - Methanol Mixture
Fig.AM.12 Variation of free energy of activation for Arjunarishta - Methanol mixture
Fig.KM.1 TDR waveform for Khadirarishta - Methanol at 35°C
Fig.KM.2 Complex permittivity spectra for 50 % Methanol in Khadirarishta - Methanol at 35°C
Fig.KM.3 Cole-Cole plot for 50% Methanol in Khadirarishta-Methanol at 35°C
Fig.KM.4 Variation of permittivity (εr) with volume % of Methanol in Khadirarishta - Methanol mixture at various temperature
Fig.KM.5 Variation of (τ) with Volume % of Methanol in Khadirarishta - Methanol mixture at various temperatures
Fig.KM.6 Variation of σ with concentration of Methanol in Khadirarishta – Methanol at various temperatures
Fig.KM.7 Variation of Excess permittivity of Methanol in Khadirarishta - Methanol mixture at various temperatures
Fig.KM.8 Variation of excess inverse relaxation time of Methanol in Khadirarishta - Methanol Mixture at various temperatures
Fig.KM.9  Plot of fB with Volume. Fraction of Methanol in Khadirarishta Methanol mixture at various temperatures
Fig.KM.10 Arrhenius Plot for Khadirarishta - Methanol Mixture
Fig.KM.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Khadirarishta - Methanol Mixture
Fig.KM.12 Variation of free energy of activation for Khadirarishta - Methanol mixture
Fig.MM.1  TDR waveform for Mahamanjishthadyarishta - Methanol at 35°C
Fig.MM.2  Complex permittivity spectra for 50% Methanol in Mahamanjishthadyarishta - Methanol at 35°C
Fig.MM.3  Cole-Cole plot for 50% Methanol in Mahamanjishthadyarishta - Methanol at 35°C
Fig.MM.4  Variation of permittivity ($\varepsilon_0$) with volume % of Methanol in Mahamanjishthadyarishta - Methanol mixture at various temperatures
Fig.MM.5  Variation of ($\tau$) with Volume % of Methanol in Mahamanjishthadyarishta - Methanol mixture at various temperatures
Fig.MM.6  Variation of $\sigma$ with concentration of Methanol in Mahamanjishthadyarishta - Methanol at various temperatures
Fig.MM.7  Variation of Excess permittivity of Methanol in Mahamanjishthadyarishta - Methanol mixture at various temperatures
Fig.MM.8  Variation of excess inverse relaxation time of Methanol in Mahamanjishthadyarishta - Methanol Mixture at various temperatures
Fig.MM.9  Plot of fB with Volume. Fraction of Methanol in Mahamanjishthadyarishta Methanol mixture at various temperatures
Fig.MM.10 Arrhenius Plot for Mahamanjishthadyarishta - Methanol Mixture
Fig.MM.11 Variation of activation enthalpy (ΔH) and activation entropy (ΔS) in Mahamanjishthadyarishta - Methanol Mixture
Fig.MM.12 Variation of free energy of activation for Mahamanjishthadyarishta - Methanol mixture
Fig.LM.1  TDR waveform for Lohasava - Methanol at 35°C
Fig.LM.2  Complex permittivity spectra for 50% Methanol in Lohasava - Methanol at 35°C
Fig.LM.3  Cole-Cole plot for 50% Methanol in Lohasava-Methanol at 35°C
Fig.LM.4  Variation of permittivity ($\varepsilon_0$) with volume % of Methanol in Lohasava - Methanol mixture at various temperature
Fig.LM.5  Variation of ($\tau$) with Volume % of Methanol in Lohasava - Methanol mixture at various temperatures
Fig.LM.6  Variation of $\sigma$ with concentration of Methanol in Lohasava - Methanol at various temperatures
Fig.LM.7  Variation of Excess permittivity of Methanol in Lohasava -
Methanol mixture at various temperatures

- Fig.LM.8: Variation of excess inverse relaxation time of Methanol in Lohasava
  - Methanol Mixture at various temperatures

- Fig.LM.9: Plot of fB with Volume. Fraction of Methanol in Lohasava
  - Methanol mixture at various temperatures

- Fig.LM.10: Arrhenius Plot for Lohasava - Methanol Mixture

- Fig.LM.11: Variation of activation enthalpy (ΔH) and activation entropy (ΔS)
  - in Lohasava - Methanol Mixture

- Fig.LM.12: Variation of free energy of activation for Lohasava - Methanol
  - mixture

- Fig.SM.1: TDR waveform for Sarivadyarishta - Methanol at 35°C

- Fig.SM.2: Complex permittivity spectra for 50% Methanol in Sarivadyarishta -
  - Methanol at 35°C

- Fig.SM.3: Cole-Cole plot for 50% Methanol in Sarivadyarishta-Methanol at
  - 35°C

- Fig.SM.4: Variation of permittivity (εε0) with volume % of Methanol in
  - Sarivadyarishta - Methanol mixture at various temperatures

- Fig.SM.5: Variation of (τ) with Volume % of Methanol in Sarivadyarishta -
  - Methanol mixture at various temperatures

- Fig.SM.6: Variation of σ with concentration of Methanol in Sarivadyarishta –
  - Methanol at various temperatures

- Fig.SM.7: Variation of Excess permittivity of Methanol in Sarivadyarishta -
  - Methanol mixture at various temperatures

- Fig.SM.8: Variation of excess inverse relaxation time of Methanol in
  - Sarivadyarishta - Methanol Mixture at various temperatures

- Fig.SM.9: Plot of fB with Volume. Fraction of Methanol in Sarivadyarishta
  - Methanol mixture at various temperatures

- Fig.SM.10: Arrhenius Plot for Sarivadyarishta - Methanol Mixture

- Fig.SM.11: Variation of activation enthalpy (ΔH) and activation entropy (ΔS)
  - in Sarivadyarishta - Methanol Mixture

- Fig.SM.12: Variation of free energy of activation for Sarivadyarishta - Methanol
  - mixture
