LIST OF TABLES

Table 2.1: Calibration chart (setting) of a 10.6 m concave grating spectrograph.

Table 3.1: Vacuum wave numbers and combination relations of the (2,0) band of the $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 3.2: Rotational constants derived from the rotational analysis (2,0) band of $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 3.3: Vacuum wave numbers and combination relations of the (2,1) band of the $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 3.4: Rotational constants derived from the rotational analysis s of (2,1)band of $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 4.1(a): Intensities of the rotational lines of the P-branch lines of (2,0) band of $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 4.1(b): Intensities of the rotational lines of the R-branch lines of (2,0) band of $A^1\Sigma-X^1\Sigma$ system of BaO.

Table 4.2(a): Intensities of the rotational lines of the P-branch lines of (2,0) band of $A^1\Sigma-X^1\Sigma$ system of BaO.
Table 4.2(b): Intensities of the rotational lines of the R- branch lines of (2,0) band of $A^1\Sigma-\chi^1\Sigma$ system of BaO.

Table 4.3: Rotational temperature of BaO derived from intensity measurements of P and R branch lines of (2,0) and (2,1) band of $A^1\Sigma-\chi^1\Sigma$ system of BaO.

Table 5.1: Molecular constants of $\chi^1\Sigma$ state of BeO.

Table 5.2: Molecular constants of $\chi^1\Sigma$ state of MgO.

Table 5.3: Molecular constants of $\chi^1\Sigma$ state of CaO.

Table 5.4: Molecular constants of $\chi^1\Sigma$ state of SrO.

Table 5.5: Molecular constants of $\chi^1\Sigma$ state of BaO.

Table 5.6: RKR,H-H,Extended Rydberg Potential

RPC for the ground state of BeO

Table 5.7: RKR,H-H,Extended Rydberg Potential

and RPC for the ground state of MgO

Table 5.8: RKR,H-H,Tietz Potential and RPC FOR the ground state of CaO

Table 5.9: RKR,H-H,Tietz Potential and RPC for the ground state of CaO

Table 5.10: RKR,H-H,Extended Rydberg Potential and RPC for the ground state of BaO
