LIST OF FIGURES

Fig. 1.1  Energy level diagram of Bao.

Fig 3.1 (a)  Spectrum of rotational structure of (2,0) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig 3.1 (b)  Fortrat parabola showing R-branch lines of (2,0) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig 3.1 (c)  Fortrat parabola showing P-branch lines of (2,0) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig. 3.1 (d)  Combination relations using P and R-branch lines of (2,0) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig. 3.1 (e)  Determination of the band origin of (2,0) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig 3.2 (a)  Spectrum of rotational structure of (2,1) band of $A^1\Sigma - X^1\Sigma$ system of BaO.

Fig 3.1 (b)  Fortrat parabola showing R-branch lines of (2,1) band of $A^1\Sigma - X^1\Sigma$ system of BaO.
Fig 3.1 (c) Fortrat parabola showing P-branch lines of (2,1) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig. 3.1 (d) Combination relations using P and R-branch lines of (2,1) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig. 3.1 (e) Determination of the band origion of (2,1) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig. 4.1 Micrometer traces of the rotational structure of (2,0) band [Ref. Fig.3. (a)] of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig. 4.2 Micrometer traces of the rotational structure of (2,1) band [Ref. Fig.3.2(a)] of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig 4.3 Intensities of the rotational lines of P-branch of (2,0) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig 4.4 Intensities of the rotational lines of R-branch of (2,0) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.

Fig 4.5 Intensities of the rotational lines of P-branch of (2,1) band of $A^1\Sigma \rightarrow X^1\Sigma$ system of BaO.
Fig. 4.6 Intensities of the rotational lines of R-branch of (2,1) band of $A^1\Sigma$ --$X^1\Sigma$ system of BaO.

Fig. 5.1 (a) The RKR, H-H & Extended Rydberg potential energy curves for the ground state of BeO.

Fig. 5.1 (b) % deviations of H-H and Extended Rydberg potentials from RKR for the ground state of BeO.

Fig. 5.1 (c) Reduced potential curve (RPC) for the ground state of BeO.

Fig. 5.2 (a) The RKR, H-H & Extended Rydberg potential energy curves for the ground state of MgO.

Fig. 5.2 (b) % deviations of H-H and Extended Rydberg potentials from RKR for the ground state of MgO.

Fig. 5.2 (c) Reduced potential curve (RPC) for the ground state of MgO.

Fig. 5.3 (a) The RKR, H-H & Tietz potential energy curves for the ground state of MgO.

Fig. 5.3 (b) % deviations of H-H and Tietz potentials from RKR for the ground state of CaO.
Fig. 5.3 (c) Reduced potential curve (RPC) for the ground state of CaO.

Fig. 5.4 (a) The RKR, H-H & Tietz potential energy curves for the ground state of SrO.

Fig. 5.4 (b) % deviations of H-H and Tietz potentials from RKR for the ground state of SrO.

Fig. 5.4 (c) Reduced potential curve (RPC) for the ground state of SrO.

Fig. 5.5 (a) The RKR, H-H & Extended Rydberg potential energy curves for the ground state of BaO.

Fig. 5.5 (b) % deviations of H-H and Extended Rydberg potentials from RKR for the ground state of BaO.

Fig. 5.5 (c) Reduced potential curve (RPC) for the ground state of BaO.
