ACKNOWLEDGEMENTS

I record my sincere gratitude for Dr. D.D. Khanolkar, M.Sc., Ph.D., D.I.C. (Lond.), F.R.I.C. (Lond.), Professor and Head of the Chemistry Department, Marathwada University, who was indulgent to me in supervising my work with patience from time to time. Without his unfailing guidance the work could not have attained its present form.

Equally valuable were the consultations, I had, with Dr. D.V. Jahagirdar, M.Sc., Ph.D., Lecturer, Department of Chemistry, Marathwada University. I am indebted to him for the numerous suggestions made to me throughout the progress of the work.

I will be failing in my duty if the valuable help of Dr. D.D. Goswami, M.Sc., Ph.D., Lecturer, Department of Chemistry, Marathwada University, in preparing some substituted acids is not acknowledged at this stage.

N.G. Palaskar.
