FORMAT

Post Graduate Department of Ophthalmology M.L.B. Medical College and Hospital, Jhansi.

Comparative study of square / triangular scleral flap in trabeculectomy along with 5-FU.

Name : 
Age : 
Sex : 
Address :

Date of starting of treatment:

Short H/O present illness:

1. Seeing halos.
2. Early onset of presbyopia.
3. Frequent changes of glasses.
4. Mild headache and heaviness.
5. Use of topical eye drops like miotics or steroids.
7. Any vascular occlusive disease like central retinal vein occlusion.
8. History of trauma, operation, post inflammation.

Family History:

1. Glaucoma
2. Hypertension

Personal History:

1. Smoking
2. Alcoholism

Investigation:

1. Ophthalmoscopy
2. Indentation tonometry (Schiotz tonometry)
3. Tomography
4. Gonioscopy
5. Perimetry

Ophthalmic Examination:

Fundus examination:

1. Pallor and cupping of the optic disc
2. Cup-disc ratio
3. Notching of the cup rim
4. Concentric enlargement of the cup
5. Haemorrhage on the disc
6. Looping of retinal venis
7. Optic nerve atrophy
