

TABLE OF CONTENTS

Section	Title	Page
	Abstract	i
	Acknowledgements	iii
	Nomenclature	viii
	List of figures	x
	List of tables	xii
Chapter 1	Introduction	1
1.1	Theory Of Cross Flow Turbine	1
1.2	Closing Remarks	5
Chapter 2	Literature Review	6
2.1	History	6
2.2	Review Of Experimental Analysis	7
2.3	Review Of Theoretical Analysis	13
2.4	Problem Statement	15
Chapter 3	Analysis Of CFT Nozzle	17
3.1	Spiral Vortex Profile As The Nozzle Wall Shape	17
3.2	Circular Arc Profile As Nozzle Wall Shape	19
3.3	Nozzles Studied	25
3.4	The Computational Domain And The Governing Equations	27
3.5	Method Of Solution	31
3.5a	Modeling	31
3.5b	Discretization	32
3.5c	Applying Boundary Condition	32
3.5d	Solution Phase	34
3.5e	Computational Facility Employed	34
3.6	Results And Discussions Of FEA Of Nozzles	34
3.6.1	A Detailed Analysis Of A Typical Nozzle	35

3.6.2	Effect Of Front And Rear Wall	38
3.6.3	Analysis Of The Effect Of Nozzle Entry Arc	45
3.6.4	Analysis Of The Effect Of Flow Rate	52
3.6.5	Analysis Of The Effect Of Supply Head	55
4	Design And Analysis Of CFT Runner	57
4.1	Physical Parameters	57
4.2	Geometrical Parameters	57
4.2.1	Blade Geometry	58
4.2.1.a	Angle Subtended By The Blade	58
4.2.1.b	Radius Of Blade Curvature	61
4.2.1.c	Runner Inner To Outer Diameter Ratio	62
4.2.1.d	Blade Thickness	62
4.2.2	Nozzle Entry Arc	63
4.2.3	Flow Stream Spreading	64
4.2.4	Angle Of Attack	64
4.2.5	Number Of Blades	65
4.2.6	Aspect Ratio	65
4.3	Range of Parameters	66
4.4	Modeling of the blade passages	67
4.5	Application of boundary conditions	67
4.6	Method of solution	70
4.7	Analysis of flow through 1 st stage runner blade passages	70
4.8	Effect of number of blades on first stage flow	78
4.9	Effect of nozzle shape on first stage flow	81
5	Experimental Facility	87
5.1	Experimental Set-Up	87
5.1.a	Turbine System	87
5.1.b	Water Inlet System	90
5.1.c	Pumping System	90
5.1.d	Loading System	92
5.1.e	Measuring System	94

5.2	Fabrication Details	96
5.2.a	Selection Of Materials	96
5.2.b	Fabrication Of Turbine Runner	97
5.2.c	Fabrication Of Turbine Nozzle	98
5.2.d	Experimental Methodology	101
5.2.e	Data Reduction	102
6	Experimental investigation of CFT with single nozzle	103
6.1	Range of parameters	103
6.2	Performance of nozzle with angle of attack of 16°	104
6.3	Performance of nozzle with angle of attack of 24°	108
6.4	Effect of angle of attack on CFT performance	108
6.5	Effect of number of blades	114
6.6	Effect of nozzle shape	118
7	EXPERIMENTAL INVESTIGATIONS ON 'CFT' WITH TWO NOZZLES	121
7.1	Need for a second nozzle	121
7.2	Range of experiments	121
7.3	The experimental procedure	122
7.4	Performance of CFT with each nozzle separately	123
7.5	Effect of flow fraction on CFT performance	128
7.6	Closing remarks	132
Chapter –8	Conclusions and scope for future work	133
8.1	Conclusions from FEA of nozzles	133
8.2	Conclusions from FEA of 1 st stage flow through runner	134
8.3	Conclusions from Experimental Investigation with single nozzle	135
8.4	Conclusions from Experimental Investigation with two nozzles	135
8.5	Scope for future work	136

APPENDIX-I	Technical details of the measuring instruments	137
	Details of magnetic flow meter	137
	Details of torque transducer TM-111	138
APPENDIX-II	Error analysis	142
APPENDIX-III	Experimental data of CFT with single nozzle	145
APPENDIX-IV	Experimental data of CFT with two nozzle	153
	References	158
