ACKNOWLEDGEMENT

The author is deeply indebted to his supervisor, Dr. Ing. S. PALANICHAMY, Professor and Head of Electrical and Electronics Engineering Department, PSG College of Technology, Coimbatore for initiating and inspiring the author to do his research. His able guidance, timely advice and continued encouragement throughout the progress of the work and also during the preparation of the Thesis report are gratefully acknowledged.

The author's sincere and heartfelt thanks are due to Dr. A. KANDASWAMY, Professor and Head of Electronics and Communication Engineering Department, PSG College of Technology, Coimbatore for all the facilities provided to carry out the research work at the department.

The author takes this opportunity to express his sincere gratitude to Prof. Dr. S. SUBRAMANIAN, Principal, PSG College of Technology, Coimbatore and the Management of the PSG Institutions for providing excellent environment required to pursue research work. The author is thankful to Dr. A. SHANMUGASUNDARAN, Former Principal, PSG College of Technology for his support, motivation and guidance.
The author is also thankful to all the Faculty members of Electrical Sciences Departments, PSG College of Technology for their help and co-operation towards the successful completion of the research work.
