CONTENTS

CONTENTS i-ii

ABSTRACT iii-iv

Chapter 1

INTRODUCTION 1-7

1.1 INTRODUCTION 1

1.2 NUCLEAR MODELS 2

1.2.1 Liquid Drop Model 2

1.2.2 Nuclear Shell Model 2

1.2.3 Collective Model 3

1.2.4 Nilsson Model 4

1.3 PRESENT FOCUS 5

1.3.1 One Particle Plus Rotor Model and Signature effects in one quasiparticle bands 5

1.4 CURRENT STATUS OF PRESENT STUDY 6

Chapter 2

ONE-PARTICLE PLUS ROTOR MODEL FORMULATION 8-18

2.1 INTRODUCTION 8

2.2 THE MODEL AND METHODOLOGY 9

2.2.1 Total Hamiltonian Formulation 9

2.2.2 Calculations of Total Wave Function 12

2.2.3 Calculation of Energy Eigen Values 14

2.3 CONCLUSION 18

Chapter 3

APPLICATIONS OF PARTICLE ROTOR MODEL 19-38

3.1 INTRODUCTION 19

3.2 RESULT AND DISCUSSION 20

3.2.1 Signature Splitting in $K=\frac{1}{2}[411]$ band of $^{169}Tm$ 20

3.2.2 Signature Splitting in $\frac{9}{2}[624]_v$ band of $^{183}Os$ 21
Chapter 4

4.1 CONCLUSIONS

4.2 FUTURE STUDIES

REFERENCES

LIST OF PUBLICATIONS

3.2.3 Signature Splitting in $\frac{7}{2}[633]_i$ band of $^{175}Hf$ 27

3.2.4 Signature Splitting in $\frac{9}{2}[624]_i$ band of $^{179}W$ 32

3.2.5 Energy Spectrum of $\frac{7}{2}[404]_i$ band of $^{183}Re$ 35

CONCLUSIONS 39-40

39

FUTURE STUDIES 40

41-43

REFERENCES 44-45
