This present work is the out come of the research carried out by me in the field of "A STUDY OF BIORTHOGONAL SETS OF POLYNOMIALS AND THEIR GENERATING RELATIONS" at the department of Mathematical Sciences and Computer Applications of Bundelkhand University, Jhansi, (U.P.).

I got this rare opportunity of working under the able guidance of Dr. P.N. Srivastava, Professor and Head of Mathematical Sciences and Computer applications department of Bundelkhand University, Jhansi.

I express my deepest sense of gratitude to Dr. P.N. Srivastava for his inspiration, competent guidance and unbounding interest in the preparation of this thesis, without his suggestions, it would not have been possible for me to accomplish my purpose.

I am highly obliged to Dr. M.A. Pathan (Professor & Chairman) and Mrs. (Dr.) Subehi Khan (Lecturer), Deptt. of Mathematics, Aligarh Muslim University, Aligarh and also Dr. S.C. Gupta (Lecturer in Mathematics), Gwalior for arranging liberal swift supply of reprints and research books which rendered me valuable help in conducting my research work.

I would be failing in my duties, if I do not express my most sincere thanks to my parents and wife who have been a constant source of inspiration in my life.
I am also thankful to Mr. Devendra Kumar Sen B.Sc.(Maths.) for excellent typing and printing of this thesis.

This thesis consists six chapters, numbered 1, 2, 3, 4, ......., etc. Each chapter is divided into several sections (Progressively numbered 1.1, 1.2, 1.3, ......., etc.)

The formulae and equations are numbered progressively within each section. For example (3.4.5) denotes the fifth formula or equation in the fourth section of chapter third.

Appendix with well known results, notations etc. are given at the end of the thesis. References are given at the end of each chapter in alphabetical order and are denoted in thesis by numbers enclosed in square brackets [ ].
