ACKNOWLEDGEMENTS

First and foremost, I offer my obeisance to Allah for his boundless blessings which accompanied me in all the endeavors.

I take this opportunity to place on record my profound gratitude and deep sense of reverence that I have for my guide Dr. S.A. Udipi, Professor and Head of the Department of Food Science and Nutrition. Her immense cognizance in this field has ignited my zeal to pursue my research work with strong determination and perseverance. The present work bears, at every stage, the impressing of her broad outlook, proficient and wise counsel, concrete suggestions, keen interest, fair and seasoned criticism and meticulous attention to details. It was indeed a privilege for me to work under her unending inspiration, guidance and support.

I also extend my sincere thanks to Dr. Padmini Ghugre, Associate Professor, Department of Food Science and Nutrition, S.N.D.T. Women's University, Juhu for providing advice and assistance whenever required.

I am grateful to Professor J.C. Sharma, for carrying out the statistical analysis for my study.

I also express my regards and gratitude to the Ministry of Health and Medical Sciences of Islamic Republic of Iran and Ministry of Human Resource Development, Government of India.

I would like to thank the all school Principals of India and Iran to allow me for conducting my research.

I would like to acknowledge and thank all the teaching and non-teaching staff members of Department of Food Science and Nutrition for providing required help whenever needed.

I am thankful to my friends Namrata Bagle, Anagha Sathye, Neha Lohia Tulsian, Rashi, Mitra Savanur, Shaghayegh, Razieh, Fezeh and Maryam who have been very helpful, not only during the period I was struggling with work but also during all other occasions, whenever they sensed the need.
With deepest love and respect I thank my parents Mr. Mohammad Masoud Hooshmand and Mrs. Leila Abbasi, whose pivotal role in accomplishing this uphill task will never be forgotten. They have been a constant source of inspiration and support to me not only in my educational career but in every sphere of my life.

My meager vocabulary would not be sufficient to thank my husband Mohammad Reza B. Ansari, whose love and commitment is beyond words. The dream of this thesis would never have approached reality without his support, encouragement, patience and understanding during the course of my research work.

Sahar Hooshmand
