

LIST OF TABLES

<i>Table no.</i>	<i>Title</i>	<i>Page no.</i>
1.	Biometric parameters of control and high calorie diet fed adult female rats (F ₀) .	66
2.	Concentrations of serum biochemical constituents in control and high calorie diet fed adult female rats (F ₀) .	67
3.	Effects of high calorie diet on fertility indices of female (F ₀) rats.	68
4.	Biometric parameters of male offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	69
5.	Serum biochemical profile of male offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	70
6.	Relative weight of the testes of male offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀) .	70
7.	Relative weight of accessory organs of male offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	71
8.	Counts of germ cells in different stages of development in the testis of offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀) .	72
9.	Age (in days) at perpetual separation and sperm parameters on post-natal day 100 of offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	73
10.	Serum insulin, leptin and testosterone concentrations in male offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	73
11.	Biometric parameters of female offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	74
12	Concentrations of some serum biochemical constituents on the day of vaginal opening in female offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	75

13	Age (in days) at vaginal opening of female offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	75
14.	Oocytes and healthy follicle counts in the ovary of female offspring (F ₁) of normal (control) and high calorie diet fed mother rats (F ₀).	76
15	Atretic follicle counts in the ovary of female offspring (F ₁) of normal (control) and high calorie diet fed mother rats (F ₀).	77
16	Serum concentrations of insulin, leptin and estradiol in female offspring (F ₁) of normal (control) and high calorie diet fed female rats (F ₀).	78
17	Effects of high calorie diet on estrous cyclicity of F ₁ rats.	78
18	Effect of high calorie diet on biometric parameters of F ₁ generation pregnant female rats .	79
19	Fertility indices of F ₁ offspring born to control and obese (F ₀) rats.	80
