Table of Contents v

Acknowledgements viii

1 Introduction 1
- 1.1 Structure of a Queueing System . . . 3
- 1.2 Analysis of Queueing Models - Various Methods . . . 11
- 1.3 A Brief History of Queueing Theory - A Survey . . . 14
  - 1.3.1 Bulk Queueing System . . . 25
  - 1.3.2 Queueing System with Vacation . . . 35
  - 1.3.3 Network Queueing System . . . 41
  - 1.3.4 Priority Queues . . . 44
  - 1.3.5 Retrial Queues . . . 45
  - 1.3.6 Queueing System Under Controllable Policies . . . 46
- 1.4 An Outline View Over the Thesis . . . 50

2 An (a,c,∞) Policy Bulk Service Queue with State Dependent Service Rates 57
- 2.1 Introduction . . . 57
- 2.2 Analysis of the Model . . . 59
- 2.3 Method of Solution . . . 60
- 2.4 Steady State Probabilities . . . 62
- 2.5 Expected Queue Length . . . 63
- 2.6 Busy Period Distribution . . . 63
- 2.7 Busy Period Distribution in Type-I Service . . . 65
- 2.8 Busy Period Distribution in Type-II Service . . . 67
- 2.9 Waiting Time Distribution . . . 69
- 2.10 Determination of the Control Limits a and c . . . 75
- 2.11 Numerical Illustration . . . 75

3 An M/M/1 Bulk Service Queue Under the Policy(a,c,d) with State Dependent Service Rates **80**
3.1 Introduction 80
3.2 Analysis of the Model 82
3.3 Method of Solution 83
3.4 Steady State Distribution 86
3.5 Expected Queue Length 87
3.6 Busy Period Distribution 87
3.7 Expected Busy Period in Type-I Service 91
3.8 Expected Busy Period in Type-II Service 93
3.9 Waiting Time Distribution 95
3.10 Optimal Control Limits 102
3.11 Particular Cases 103
3.12 Numerical Illustration 104

4 A State Dependent M/G/1 Bulk Service Queue Under the Policy (a,c,d) - An Analytic Approach **108**
4.1 Introduction 108
4.2 Model Description 110
4.2.1 Queue Length Probability Distribution 112
4.2.2 Steady State Probabilities of Queue Length Distribution 114
4.3 Probability Generating Function of the Queue Length Distribution . . 116
4.4 Probability Distribution of System Size 121
4.5 Expected Queue Length 127
4.5.1 Relationship Between Probabilities of Queue Length and System Size 129
4.6 Waiting Time Distribution of a Customer in the Queue 130
4.6.1 Expected Waiting Time 133

5 A State Dependent $M/G^{(a,c,d)}/1$ Queue with Single Vacation **134**
5.1 Introduction 134
5.2 Notations and Model Analysis 136
5.3 Some Results on Queue Length Distribution 140
5.4 Queue Length Distribution at Arbitrary Epoch 146
5.5 Distribution of System Size 152
5.5.1 Particular Case 153
5.6 Distribution of Queue Length at the End Points of Batch Service and Vacation period 153
5.7 Distribution of Queue Length at the Departure Epoch 156

5.8 Relationship Between the Queue Length Distribution at Various Epoch 159
5.9 Queue Length Distribution at Service Completion Epoch 162
5.10 Optimal Control Limits 164
5.10.1 Busy Period in Type-I Service 165
5.10.2 Busy Period in Type-II Service 167
5.11 Numerical illustrations 169

6 M/M(a,c,d)/1 Bulk Service Queue with Accessible and Non-Accessible Batches 173
6.1 Introduction 173
6.2 Analysis of the Model 175
6.3 Steady State Distribution 176
6.4 Expected Queue Length 179
6.5 Busy Period Distribution 179
6.6 Busy Period in Type-I Service 183
6.7 Busy Period in Type-II Service 185
6.8 Waiting Time Distribution 188
6.9 Optimal Control Limits 194
6.10 Numerical Illustration 195

7 An (a,c,d) Policy M/M/1 Bulk Service Queue with Single and Batch Service 199
7.1 Introduction 199
7.2 Analysis of the Model 200
7.3 Method of Solution 202
7.4 Steady State Probabilities 204
7.5 Expected Queue Length 205
7.6 Expected busy period 205
7.7 Distribution of the Busy Period in Batch Service 206
7.8 Determination of the Optimal Control Limits 208
7.9 Particular Cases 209
7.9.1 Case-I: 209
7.9.2 Case: II 209
7.9.3 Case: III 210
7.10 Numerical Illustration 211

Bibliography 216
