

List of Diagrams

Diagram 1 :	12
Diagram 2 :	Horizontal section of the eye.....	12
Diagram 3 (a)	14
Diagram 3(b)	14
Diagram 4	Dim light Strong light.....	14
Diagram 5 (A)	Direct glare is associated with heads-up position.	30
(B)	Indirect or reflected glare is associated with heads-down position.....	30
Diagram 6	Different type of fixtures.....	33
Diagram 7	Permissible contrast between bright areas within the visual field.....	36
Diagram 8	The angle between the horizontal line of vision and the line between eye and light source should be greater than 30°.	37
Diagram 9	A bad positioning of the light. The reflected light from the table enters the line of the vision, and causes dazzle.	38
Diagram 10	A good positioning of lights. When the lamps are placed to the side dazzle from reflected light is greatly reduced.....	38
Diagram 11	The degree of non-uniformity in illumination is influenced by the ratio between mounting height and the distance between the fillings	39
