

## LIST OF FIGURES

Figure No.	Title	page No.
1	Location of the study area	91
2	Mean work time of female workers in different agricultural activities	119
3	Physiological costs of work by mean and peak heart rate (beats min <sup>-1</sup> )	122
4	Physiological costs of work by energy expenditure (kjmin <sup>-1</sup> ) in different agricultural activities	123
5	Relationship between heart rate and rating of perceived exertion	128
6	Hourly working and peak heart rate of female agricultural workers during picking of stalks and stubbles	133
7	Hourly working and peak heart rate of female agricultural labourers in sowing	133
8	Hourly working and peak heart rate of female agricultural Labourers during transplanting of paddy	134
9	Hourly working and peak heart rate of female agricultural labourers during weeding	134
10	Hourly working and peak heart rate of female agricultural labourers during interculturing	135
11	Hourly working and peak heart rate of female agricultural labourers during cutting of wheat crops	135
12	Hourly working and peak heart rate of female agricultural labourers during cutting of jowar crop	136
13	Average resting, working, peak and recovery heart rates (beats, min <sup>-1</sup> ) of female agricultural workers for different agricultural activities	142
14 a & b	Mean recovery heart rate responses of women in performing different agricultural activities	143
15	Relationship between body weight and heart rate of female agricultural workers	145

Figure No.	Title	pagesNo.
16	Relationship between age and heart rate responses of female agricultural labourers	145
17	Physiological workload of female agricultural labourers in different agricultural activities	149
18	Classification of workload of female agricultural workers based on mean and peak working heart rates	151
19a & b	Relationship between physical fitness scores by age and body weight	159
20	Aerobic capacity ( $VO_2$ /min) and age of female agricultural labourers	162
21a	Aerobic capacity ( $VO_2$ l/min) with body weight of female agricultural labourers	163
21b	Aerobic capacity ( $VO_2$ /min) with body weight of female agricultural labourers	163
22	Percentage distribution of agricultural labourers based on physical fitness levels by $VO_2$ (ml/kgxmin <sup>-1</sup> )	168
23	Acceptable limits of workload on women (above 35%) based on mean and peak heart rates	175
24	Relative load (%) on female agricultural labourers based on mean and peak heart rate	177
25	Hourly mean work-rest pattern of female agricultural labourers	181
26	Postures in agricultural activities	199
1	Picking of stalks and stubbles	
2	Sowing	
3	Transplanting	
4	Weeding	
5	Interculturing	
6	Harvesting of wheat	
7	Harvesting of jowar	

<b>Figure No.</b>	<b>Title</b>	<b>page No.</b>
27	Age groupwise prevalance of musculoskeletal problems among the female agricultural labourers	213
28	Comfort and discomfort level of the pains before and after the occupational work by the female agricultural labourers	220
29	Duration of the musculoskeletal problems	226
30	Percentage of women hospitalized and change in duties due to musculoskeletal problems	232
