I must acknowledge with great affection the whole-hearted love and support of Smt. Leela who has taken utmost care of my son during the period of my study.

I express my entire affection for my dear husband, Shri. Anish, the most important person in my life, who has always been a source of inspiration and pillar of strength. Without his immense understanding and support, this study would not have been completed. My deep appreciation to him is inexpressible in any language.

Finally and most importantly, I would like to dedicate this work to my beloved children, Akshadha and Adinath, who could not avail the required care at this tender age. The maturity shown in accepting my absence and the silent support of these tiny tots was the real motivation for completing the study within the specified time.
