Acknowledgements

First and foremost, I would like to thank God, and my family members for their blessings throughout my journey.

I take this opportunity to place on record my profuse gratitude to my guide and mentor, Dr. H. K. Manonmani, Scientist, Fermentation Technology and Bioengineering Department, Central Food Technological Research Institute, Mysore for her unparalleled guidance and thorough involvement throughout my Ph. D. program. She has been more than a friend and has supported me in times of distress.

I thank Dr. V. Prakash, Director, Central Food Technological Research Institute, Mysore, for permitting me to carry out my Ph. D. work at CFTRI.

I thank CSIR, New Delhi for giving an opportunity in the form of Senior Research Fellowship to make my Research venture successful.

My thanks are due to Dr. S. Divakar, Head, Fermentation Technology and Bioengineering Department, CFTRI, Mysore, for his encouragement.

I wish to express my profound thanks to Dr. N. G. Karanth and Dr. M. C. Misra, former heads of the Department for their suggestions and inspiration.

I am extremely thankful to Dr. P. Srinivas, Head, Plantation Products, Spices and Flavor Technology, Dr. N. K. Rastogi, Scientist, Department of Food Engineering, and Mr. Akmal Pasha, Scientist, Food Protectants and Infestation Control for helping me to carry out some experiments without which my work would have been incomplete.

I thank Dr. Arun Chandrasekhar, Scientist (retired), CFTRI, for his help and discussions during primer designing process.

I am highly indebted to Dr. Muthukumar, Scientist, Bio-chemistry and Nutrition, CFTRI, Mysore, for his help in the immunisation of animals.

My thanks to Dr. Gurudutt, Head, FS & AQCL, and Dr. Rati E. Rao, Scientist (retired), CFTRI, for the good discussions I had with them.

I thank Mr. Kantha, Head CIFS, CFTRI and all his staff for their help during my research.
Its my pleasure to acknowledge Dr. M. S. Thakur, Scientist, Fermentation Technology and Bioengineering Department for the fruitful discussions I had with him. I thank him for all his timely help.

I am extremely thankful to Dr. S. G. Prapulla, Dr. Avinash P. Sattur, Dr. Somashekhar and Dr. Yogish, Scientists, Fermentation Technology and Bioengineering Department for their untiring encouragement and valuable suggestions.

Thanks are also due to the staff of FOSTIS library for their kind help whenever required.

CFTRI has gifted me with many friends. I thank all of them for making my stay memorable and cherishable.

It’s my pleasure to thank Pushpa madam, Latha, Murthy, Mandappa, Selvi and Sowmya for their constructive criticisms and timely help throughout my stay.

The belief my family had in me and the encouragement I received from them is among the fruition. I am very thankful to my husband, my parents and in-laws law for their co-operation and encouragement. My thanks to nieces Ananya and Anagha, nephew Deepak and my little daughter Ankitha for their pranks that kept me in a relaxed mood.

The list of people is too big to accommodate in these papers but definitely, all those who helped me will remain in my heart forever.

Deepthi, N
