ACKNOWLEDGEMENT

A few lines are not enough to express my sincere gratitude, respect and reverence to Prof. (Dr.) Shabahat Husain. I consider it to be a privilege and take pride to be associated with him for more than last two decades, right from the time I joined the department as a student of B.Lib.Sc. But for his motivation, I would not have pursued my higher education and be in a position to submit this thesis. I am very thankful for all the support and guidance, he has given in the compilation of the present thesis.

I take this opportunity to express my sincere thanks to Prof. Mohd. Sabir Husain, Former Chairman, Department of Library & Information Science, for his motivation and blessings throughout my stay in the department.

The unstincted support provided by librarians, library staff members and users of the institutions which were surveyed during the research process is beyo nd any description, especially in providing the literature on my research topic and also for responding the questionnaires made for the purpose.

I wish to express my deep sense of gratitude to all faculty members of the department for their time to time help, suggestions and remarks without which this work would have been a little difficult to complete.

I express my deepest gratitude to Dr. N. K. Goel, ALO, National Medical Library, Mr. Jahangir Khan, Librarian, B. B. Dixit library of AIIMS, Mr. Lav kush, Incharge, National Documentation Centre of NIHFW and Ms. Neha of Maulana Azad Medical college for their kind cooperation and help in providing the data related to present study.

Thanks are also due to all persons who have helped me directly or indirectly during the completion of my research work.

Last but not the least, I wish to thank my wife Mrs. Urooj Mumtaz, Assistant Teacher, Ismail Girls National Inter College, Meerut, for bearing with me at the cost of our social life and providing moral support all through the completion of this thesis.

[Jamal Ahmad Siddiqui]
