*Alhamdulillah, all praises and every gratitude is only due to the Almighty ALLAH. It is His blessings and countless favours that have shaped this thesis. I bow to Him in gratitude and I seek His blessing and forgiveness for me and the people around.*

*Our Beloved Prophet Muhammad (May Allah's Peace, Mercy and Blessings be upon him) said that none is grateful to ALLAH unless he is grateful to His creation and to acknowledge them is to acknowledge Him.*

*I believe that researchers in a lab constitute a family with some respectable and learned elders, a few growing scientists and the new comers who deserve love and guidance. In this context, my lab stands exemplary as Dr. Nida Qutub and Bilal Masood Pirzada deserve a lot of thanks for sharing their scientific experience and in carving all their juniors in the right frame of research. Next to them, Dr. Saima Sultana, Dr. Shabana Noor, Ms. Ishat, Ms. Nehaal , Mr. Danish and Mr. Nafees also deserve sincere and deep appreciation for their guidance, advice, suggestions, cooperation, support and encouragement.*

*I wish to express my sincere thanks to Prof. Shabbir Ahmad and Dr. Shahid Husain, Department of physics, AMU for providing the instrumentation facility required for my experimentation. I would also like to thank Dr. Irshad Ahmad and Mr. Sheraz Ahmad, Department of Physics, AMU for their kind help and encouragement during my research work.*

*No endeavour of our life is achievable if our other self i.e., our friends are not there to nudge us and keep us in ignited spirits. Many people have their share in shaping and making my life colourful. They have always been there for me to encourage me when I was low, and pat me when I needed one. This acknowledgement cannot be completed if gratitude and thankfulness is not conveyed to them. Second to none in this category is my beloved senior **Mr. Hilal Ahmad Bhat**. Being with him at AMU was a turning point of my life. I take this opportunity to thank him for every advice, emotional support and care.*
