Chapter – 1

Introduction to superconductivity and magnetic measurement techniques

| | | |
|-----|---|----|
| 1.1 | Introduction | 1 |
| 1.2 | Basics of superconductivity | 4 |
| 1.3 | Josephson effect | |
| | 1.3.1 Single-particle tunneling | 8 |
| | 1.3.2 dc Josephson effect | 9 |
| | 1.3.3 ac Josephson effect | 12 |
| | 1.3.4 Types of Josephson junctions | 14 |
| 1.4 | Superconducting quantum interference device (SQUID) | |
| | 1.4.1 Introduction | 16 |
| | 1.4.2 Flux quantization | 17 |
| | 1.4.3 dc SQUID | 20 |
| | 1.4.3.1 dc SQUID - operating principle | 21 |
| | 1.4.4 rf SQUID | 24 |
| 1.5 | Susceptibility measurement techniques | |
| | 1.5.1 dc - susceptibility | 26 |
| | 1.5.1.1 Introduction | 26 |
| | 1.5.1.2 Induction methods | 27 |
| | 1.5.1.2.1 Moving coil (extraction) method | 28 |

| | | |
|-----------|--|----|
| 1.5.1.2.2 | Vibrating coil method | 28 |
| 1.5.1.2.3 | Vibrating sample magnetometer | 31 |
| 1.5.1.2.4 | Torque magnetometer | 31 |
| 1.5.1.3 | Magnetic measurement using DAC | 32 |
| 1.5.2 | ac - susceptibility | |
| 1.5.2.1 | Introduction | 35 |
| 1.5.2.2 | Measurement of ac χ by mutual inductance method | 35 |
| 1.6 | Gradiometers | |
| 1.6.1 | Introduction | 37 |
| 1.6.2 | First - order gradiometer | 38 |
| 1.6.3 | Higher - order gradiometer | 39 |
| 1.7 | Noise reduction in the experimental setup | 42 |
| 1.8 | Motivation for the present work | 44 |

Chapter - 2

Development of dc SQUID magnetometer and characterization

| | | |
|---------|---|----|
| 2.1 | Introduction | 49 |
| 2.1.1 | Design of SQUID | 50 |
| 2.1.2 | Fabrication of SQUID | 52 |
| 2.1.3 | Characterization of SQUID | 54 |
| 2.1.3.1 | Flux locked loop electronics | 56 |
| 2.2 | Development of cryostat - Kalpakkam Cryostat | 57 |
| 2.3 | Insert - Kalpakkam cryostat | 60 |
| 2.4 | Exchange gas chamber - Kalpakkam cryostat | 66 |
| 2.5 | Instrumentation of dc SQUID magnetometer | 67 |
| 2.6 | Optimization of dc SQUID magnetometer | 72 |
| 2.7 | Appendix A: Calibration of thermometers | 78 |
| 2.8 | Appendix B: Program script for conversion of Cernox resistance to | |

| | | |
|------|--|----|
| | temperature using Origin 7.5 | 80 |
| 2.9 | Appendix C: Program script for conversion of Silicon diode voltage to temperature using Origin 7.5 | 82 |
| 2.10 | Appendix D: Program script for conversion of Cernox resistance to temperature using C - language | 84 |

Chapter – 3

Development of dc SQUID vibrating coil magnetometer (SVCM), characterization and optimization

| | | |
|-----|---|-----|
| 3.1 | Introduction | 86 |
| 3.2 | Development of cryostat - CCT Cryostat | 87 |
| 3.3 | Insert - CCT Cryostat | 89 |
| 3.4 | Exchange gas chamber - CCT Cryostat | 90 |
| 3.5 | Calibration of bi-morph piezoelectric actuators (PZT) | 92 |
| | 3.5.1 PZT- Calibration at room temperature | 95 |
| | 3.5.1.1 PZT-Voltage dependence | 103 |
| | 3.5.1.2 PZT-Frequency dependence | 108 |
| | 3.5.2 PZT- Calibration at low temperatures | 110 |
| 3.6 | Characterization of SQUID (CCT-SQUID) | 114 |
| | 3.6.1 $V - \varphi$ Characteristics | 119 |
| | 3.6.2 SQUID output for various input (waveforms) | 122 |
| | 3.6.3 Flux locked loop scheme | 124 |
| 3.7 | Design and fabrication of VCM | 126 |
| 3.8 | Optimization of the dc SQUID VCM | 135 |
| | 3.8.1 Phase sensitive detection | 135 |
| | 3.8.2 Voltage dependence | 136 |
| | 3.8.3 Magnetic field dependence | 137 |
| | 3.8.4 Frequency dependence | 137 |

Chapter - 4

Simple uniaxial pressure device for ac-susceptibility measurements suitable for closed cycle refrigerator system

| | | |
|-------|---|-----|
| 4.1 | Introduction | 147 |
| 4.2 | Details of the experimental setup | 148 |
| 4.2.1 | Uniaxial pressure cell | 149 |
| 4.2.2 | Coil system | 151 |
| 4.3 | Temperature measurement, control and automation | 153 |
| 4.4 | Measurement procedure and calibration | 154 |
| 4.5 | Performance of the system | 159 |
| 4.6 | Features | 161 |

Chapter – 5

Summary and future outlook

| | | |
|-----|-----------------------|-----|
| 5.1 | Summary of the thesis | 166 |
| 5.2 | Future directions | 167 |
