

Acknowledgment

I express my sincere gratitude to **Dr.S.Arumugam**, my research supervisor, for initiating me into this fascinating field of low temperature. It was a great pleasure to work under this pioneer. His timely guidance, clearcut suggestions and critical analyses have helped in identification priorities and successful completion of the thesis.

I am greatly indebted to **Dr.Y.Hariharan**, **Shri.M.P.Janawadkar**, and **Dr. P.Ch.Sahu** in Materials Science Division (MSD), Indira Gandhi Center for Atomic Research (IGCAR), Kalpakkam, Tamilnadu, India, **Dr.S.Kasthuriangan**, Chairman, Center for Cryogenic Technology (CCT), Indian Institute of Science (IISc.), Bangalore, Karnataka, India, and **Dr.C.Sunder**, Head, MSD, IGCAR for their active collaboration and moral support made this thesis a reality. Their enthusiasm and dedication are incomparable.

I gratefully acknowledge **Dr.K.Gireesan** and **Mr.P.Nagendran** for their valuable guidance during the dc SQUID magnetometer experiments in all orientations. Their mastery of low temperature physics and SQUID has been of immense help in planning and carrying out the SQUID experiments. Their profound knowledge and the skills have been helpful in improving the quality of the thesis. I would also like to thank **Mr.J.Jayapandian**, MSD who helped me in the SQUID electronics and in data automation.

I gratefully thank **Mrs.S.Kalavathi** for helping me in writing a temperature conversation program for Cernox sensor and in calibration of the temperature sensors. I would also like to thank the members of the liquid helium plant in the MSD, IGCAR Kalpakkam for helping me in providing liquid helium and liquid nitrogen.

I would like to thank **Er.Easwaran, Mr.Balakrishnan** and **Mr.S.Natarajan** and all the employees of Central Work Shop who have helped me in fabricating many crucial components for my experimental setup.

Also I wish to thank the help from **Mr.P.Babu** and **Mr.M.Kuppusamy** in MSD, IGCAR Kalpakkam who help me during the assembling of experimental setup.

I would like to thank the people of **M/s. Sri Staar Engineering, Khajapet, Trichy**, who fabricated some components precisely and faster.

I gladly recall the friendship I enjoyed with **Mr.R.Baskar, Mrs.Rita Saha, Ms.T.Geethakumary, Dr. L.S.Vaidyanathan, Mr. Deepak Baisnav,** and **Mrs. Padma Gopalan** and thank them for encouragement and moral support.

I gratefully thank **Mr. Anadh Bahuni** and **Mr. Srinivasan** who help me in lot during the SVCM measurements in CCT, IISc., Bangalore.

My special word of thanks to **Prof.K.Ramamurthi** for careful proof reading of the thesis and his valuable suggestions. I thank **Prof. M. Daniel**, Head, School of Physics, Bharathidasan University for his advice and support. Also, I wish to thank **Prof. M. Lakshmanan**, faculty members in the School of Physics, Bharathidasan University for their continued support. Also, I would like to thank my lab mates **Mr.K.Mydeen** and **Ms.A.Murugeswari** and all the research scholar in the School of Physics, Bharathidasan University.

I would like to thank **Mr. P. Megavarana Ezhilarasu, D.E.C.E, Emexel Technology Pvt. Ltd., Chennai** who helped me in circuit designing and simulation.

I would like to thank **Prof. Mamoru Ishizuka**, Department of Material Physics, Osaka University, Japan from whom we get the valuable advice in designing the pick-up coil.

The financial support received from the Board of Research in Nuclear Sciences (BRNS), Department of Atomic Energy, Government of India and Council of Scientific and Industrial Research (CSIR), Government of India at various stages of the work is also gratefully acknowledged.

Finally, I would like to thank my parents and all my family members for their support throughout my life without which this endeavour would not have been successful.
