ACKNOWLEDGEMENT

I am very much greatful and thankful to each and every individual, but for whose help and advice this thesis entitled 'ECONOMICS OF INEQUALITIES IN UNIVERSITY EDUCATION' would not have seen the light of the Day. Hence I take the opportunity to express my deep sense of gratitude and acknowledge their patronage. A sense of humanism, generating equality and freternity is thus sowed and fed in the younger minds of our posterity. At higher levels curricula could be tailor-made and oriented from time to time introducing socio-economic and cultural activities encouraging and offering opportunities to one and all for healthy involvement. To what extent our educational system has catered towards this end is debatable issue. Hence this study has been undertaken by me to findout whether our higher educational system is capable of achieving this goal is assessed by conducting a research in a selected area of a district in Tamil Nadu.

I am indeed very much indebted to the Vice Chancellor and Registrar, Bharathidasan University for having given a chance to me to persue this course and for providing necessary assistance.
