INDEX

Acknowledgement i
Abstract ii
List of Tables ix
List of Figures xii
Glossary of Symbols xvii

CHAPTER 1: LIQUID STRUCTURE AND DIELECTRIC RELAXATION 1 - 17
[A] Introduction
[B] Techniques to determine liquid structures
[C] Dielectric relaxation in liquids
[D] Introduction to the problem

CHAPTER 2: THEORIES OF DIELECTRIC RELAXATION AND STRUCTURE OF BINARY LIQUIDS 18 - 56
[A] Introduction
[B] Static permittivity
[C] Theories of static permittivity
[D] Dynamic permittivity
[E] Models of dynamic permittivity
[F] Excess dielectric properties in binary mixtures
[G] Kirkwood correlation factor
[H] Thermodynamic properties
[I] Bruggeman mixture formula

CHAPTER 3: THE EXPERIMENTAL TECHNIQUES 57 - 130
PART-I: EXPERIMENTAL
[A] Introduction
[B] Frequency domain technique
[C] Time domain technique
[D] Method used for present work

PART-II: SIGNAL PROCESSING AND DATA ACQUISITION
[A] Introduction
[B] Fourier transform
CHAPTER 4: BINARY SYSTEMS

[A] Acetonitrile - Methanol
[B] Butanenitrile - Methanol
[C] Pentanenitrile - Methanol
[D] Hexanenitrile - Methanol
[E] Octanenitrile - Methanol
[F] Decanenitrile - Methanol
[G] Undecanenitrile - Methanol
[H] Acetonitrile - Water

CHAPTER 5: CONCLUSION

APPENDIX

I) Determination of effective pin length
II) Flow chart of data transfer from TDR to PC/XT Computer
III) List of Computer Programms
   1) TRANS
   2) DATAHOMS
   3) SNAWR1
   4) SMFIT
   5) LSTZC
   6) INVFQ
   7) SN6
   8) SNEX
   9) SNTAEX
  10) SNTHP

(IV) List of Publications
