LIST OF TABLES :

Chapter 1:
Table 1: Physical Constants of n-nitriles.

Chapter 4:
Table A1: Static dielectric constants and relaxation times for Acetonitrile-Methanol binary system at different temperatures.
Table A2: Kirkwood correlation factor $g_{\text{eff}}$ for Acetonitrile-Methanol binary system at different temperatures.
Table A3: Activation energy $\Delta H$ for Acetonitrile-Methanol binary system.
Table B1: Static dielectric constants and relaxation times for Butanenitrile – Methanol binary system at different temperatures.
Table B2: Kirkwood correlation factor $g_{\text{eff}}$ for Butanenitrile- Methanol binary system at different temperatures.
Table B3: Activation energy $\Delta H$ for Butanenitrile-Methanol binary system.
Table C1: Static dielectric constants and relaxation times for Pentanenitrile-Methanol binary system at different temperatures.
Table C2: Kirkwood correlation factor $g_{\text{eff}}$ for Pentanenitrile-Methanol binary system at different temperatures.
Table C3: Activation energy $\Delta H$ for Pentanenitrile-Methanol binary system.
Table D1: Static dielectric constants and relaxation times for Hexanenitrile-Methanol binary system at different temperatures.
Table D2: Kirkwood correlation factor $g_{\text{eff}}$ for Hexanenitrile-Methanol binary system at different temperatures.
Table D3: Activation energy $\Delta H$ for Hexanenitrile-Methanol binary system.

Table E1: Static dielectric constants and relaxation times for Octanenitrile-Methanol binary system at different temperatures.

Table E2: Kirkwood correlation factor $g_{eff}$ for Octanenitrile-Methanol binary system at different temperatures.

Table E3: Activation energy $\Delta H$ for Octanenitrile-Methanol binary system.

Table F1: Static dielectric constants and relaxation times for Decanenitrile-Methanol binary system at different temperatures.

Table F2: Kirkwood correlation factor $g_{eff}$ for Decanenitrile-Methanol binary system at different temperatures.

Table F3: Activation energy $\Delta H$ for Decanenitrile-Methanol binary system.

Table G1: Static dielectric constants and relaxation times for Undecanenitrile-Methanol binary system at different temperatures.

Table G2: Kirkwood correlation factor $g_{eff}$ for Undecanenitrile-Methanol binary system at different temperatures.

Table G3: Activation energy $\Delta H$ for Undecanenitrile-Methanol binary system.

Table H1: Static dielectric constants and relaxation times for Acetonitrile-Water binary system at different temperatures.

Table H2: Kirkwood correlation factor $g_{eff}$ for Acetonitrile-Water binary system at different temperatures.

Table H3: Activation energy $\Delta H$ for Acetonitrile-Water binary system.
Chapter 5:
Table 1: Static dielectric constants of pure n-nitriles at different temperatures. 266
Table 2: Relaxation times of pure n-nitriles at different temperatures. 267
Table 3: Comparative values of $\varepsilon_0$ and $\tau$ for n-nitriles at 20°C and n-nitriles at 25°C. 268
