ACKNOWLEDGEMENTS

First of all, I must express my sincere thanks and immense gratitude to my erudite and revered supervisor Dr Sanjay Panwar, Associate Professor, Department of Physics, Maharishi Markandeshwar University, Mullana (Ambala). He not only suggested the topic but also has been an inspiring and driving force for this work. Without his timely and untiring help, it would not have been possible to present the thesis in the present shape.

I am extremely thankful to Dr J. K. Sharma, Professor & Head, Department of Physics and Principal, M M Engineering College, MMU, Mullana (Ambala) for providing me an opportunity to carry out the work. I am also thankful to Dr Sunil Kumar, Associate Professor, Department of Physics, Maharishi Markandeshwar University, Mullana (Ambala) for his consistent encouragement and sincere advice throughout this study.

The work in this dissertation forms part of a project on ‘Effect of Cold work and aging on Microstructure and Mechanical Properties of Interstitial Free (IF) Steels’ funded by the Department of Science & Technology, Govt. of India, New Delhi under Young Scientist Scheme (SR/FTP/ETA-044/2009).

Thanks are due to Mr Rajesh Kalia and Mr Vimal Mehta for their moral support during the course of this work. I am highly obliged and wish to owe my sincere thanks to the technical and administrative staff of MMEC who helped me in all possible ways during the experimental work.
