ACKNOWLEDGEMENT

It is beyond doubt that without the help to Allah, the Almighty, this work would have not been accomplished. Thus, all thanks and praise be to Him.

I would like to express my deepest sense of gratitude to my PH.D thesis supervisor, Prof. A. R. Fatih, whose genuine supervision and advice guided me throughout the writing of this work. I am highly indebted to his kindness and encouragement. His insightful suggestions, sharp observation and incisive criticism made my work easy at all stages of this dissertation.

Special thanks go to Prof. S. Imtiaz Hasnain, Chairman of the Department of Linguistics in AMU (Aligarh) for his kindness and help.

Many thanks go to all the teachers in the Department and to the non teaching staff.

Many thanks are due to my friends for their moral support. Dr. Bassim Kan'an, Dr. Baher Amer. Dr. Asim Khatab, Dr. Atef odeh.

Nothing ever can express my love and respect for my parents for their support (morally, financially and otherwise) and continuous encouragement throughout my life. I am really grateful to their since
prayers for my well-being and success, which have made my life in a foreign country so smooth and pleasant. I would never forget my brothers and sisters who have never hesitated to offer their help and assistance to me in their way.

I thank Allah Who "He has taught man that which he knew not" for everything.

MOHAMMAD YAHYA ALI BANI SALAMEH
