## 1. Introduction

1.1 Consumer as defined in the global perspective                          1-18  
1.2 Consumer as defined under Indian law                                   2  
1.3 India as an agricultural economy                                       5  
1.4 Effect of globalization on India’s economic growth                    6  
1.5 Mumbai as mini-India- consumer based city                              9  
1.6 Genetic Modification / biotechnology                                  9  
1.7 Genetically Modified foods in India                                    10  
1.8 Evaluation                                                           15  
1.9 Challenges and controversies                                          16  

## 2. Literature Review

2.1 Consumer and the need for their protection in the era of globalization 19  
2.2 Indian Consumer and their Protection                                   37  
2.3 Global scenario of consumers awareness of Genetically Modified Foods  48  
2.4 Consumers perception and purchasing behavior towards Genetically Modified Foods globally 66  
2.5 Research gap                                                           77  

## 3. Research Methodology

3.1 Research defined                                                      79  
3.2 Research gap                                                           80  
3.3 Statement of the problem                                               80  
3.4 Relevance of study                                                    81  
3.5 Objectives of the study                                               82  
3.6 Formulation of Hypothesis & Testing Tools                              82  
3.7 Methodology                                                           84  
3.8 Sources of data                                                        84  
3.9 Interviews                                                            86  
3.10 Research design                                                      91  
3.11 Universe of study                                                    91  
3.12 Techniques of sampling                                               92  
3.13 Sample size                                                          94  
3.14 Variables of study                                                   95  
3.15 Reliability                                                          97  
3.16 Scope of the study                                                   98  
3.17 Limitation of the study                                              99  
3.18 Utility of the study                                                 99  

iii
3.19 Scheme of Chapterization 101

4. **Data Presentation, Analysis and Interpretation** 102-175
   4.1 Demographic profile of respondents in terms of their gender, age, profession, educational qualification, preference of food, marital status and income profile 102
   4.2 Profile of respondents with respect of consumer rights & Genetically Modified Foods 114
   4.3 Study Objectives 123
   4.4 Hypothesis 131
   4.5 Structural Equation Modeling (SEM) 165
   4.6 Analysis 168
   4.7 Conclusion 174

5. **Findings and Observations, Conclusions and Suggestions** 176-187
   5.1 Findings 176
   5.2 Observations 178
   5.3 Conclusions 180
   5.4 Suggestions and scope for further research 181

**Bibliography** 188-195

**APPENDIX**
Annexure 1 – Questionnaire 196-206
Annexure 2 – Interviews 207-250
