CONTENTS

PREFACE

CHAPTER 1 INTRODUCTION
1.1 Introduction
1.2 Group V Semimetals and its oxides
1.3 Earlier studies on bismuth, antimony, bismuth oxide and antimony oxide
References

CHAPTER 2 APPARATUS AND EXPERIMENTAL TECHNIQUES USED IN THE PRESENT STUDY
2.1 Introduction
2.2 Methods of preparation of films
2.3 Resistive heating evaporation
2.4 Production of vacuum
2.5 Oil sealed rotary pump
2.6 Diffusion pump
2.7 Vacuum coating plant
2.8 Substrate cleaning
2.9 Substrate heater and temperature measurement
2.10 Preparation of films
2.11 Sample annealing
2.12 Measurement of thickness of film
2.13 Measurement of electrical conductivity
2.14 Conductivity cell
2.15 Electrometer
2.16 U.V-visible spectrophotometer
2.17 X-ray diffractometer
References

CHAPTER 3 ELECTRICAL CONDUCTIVITY MEASUREMENTS IN BISMUTH, ANTIMONY, BISMUTH OXIDE AND ANTIMONY OXIDE THIN FILMS
3.1 Introduction
3.2 Theory
3.3 Bismuth
3.4 Antimony
3.5 Bismuth oxide
3.6 Antimony oxide
Conclusion
References
CHAPTER 4  OPTICAL STUDIES IN BISMUTH, ANTIMONY, BISMUTH OXIDE AND ANTIMONY OXIDE THIN FILMS
4.1 Introduction
4.2 Theory
4.3 Determination of energy band gap
4.4 Bismuth
4.5 Antimony
4.6 Bismuth oxide
4.7 Antimony oxide
Conclusion
References

CHAPTER 5  X-RAY DIFFRACTION STUDIES ON BISMUTH, ANTIMONY, BISMUTH OXIDE AND ANTIMONY OXIDE THIN FILMS
5.1 Introduction
5.2 Theory
5.3 Bismuth
5.4 Antimony
5.5 Bismuth oxide
5.6 Antimony oxide
Conclusion
References

CHAPTER 6  SUMMARY
