ACKNOWLEDGEMENT

The very idea of this work having been completed makes me ponder over words to thank the one above all of us, the omnipresent God, for answering my prayers, and providing me all those people around me who helped me in every possible manner to complete my research work.

A major research project like this is never the work of anyone alone. The contributions of many different people, in their different ways, have made this possible. Words should be inadequate to convey my deepest gratitude to my supervisor Professor C. S. Pundir in words. With his sagacious advices, understanding, patience, enthusiasm, responsibility, vivid discussions, insight, sensibility, observation, rigor, and above all with his friendly nature, he helped me in appreciating my Ph.D. work. Throughout, he provided encouragement, good company, and lots more. I shall consider it a privilege to have worked with him. I am also thankful to HOD, Biochemistry for providing me basic infrastructure in the department.

Words are inadequate for Dr. Sandeep Singh, Deptt. of Biochemistry, M.D University, for his help during thesis writing.

I am highly thankful to Mrs. Sneh Lata Pundir, who always had been caring and affectionate for all research scholars.

I am in paucity of words to thank my mummy and papa whose magnanimous love, support, encouragement and patience enable me to achieve and shape me into what I am today. I want to bow my head to them, as they are next to God for me on this earth. I would like to thank my in-laws for their continuous support and patience during my research work.

On this very special occasion, I would like to remember & thank my Uncle late Sh. Thakur Das Verma for his valuable teachings throughout my schooling, fatherly affection & care.

My vocabulary is quite inadequate to bring out my feelings for my husband Mr. Vijay Kalra, for his constant help, support and encouragement throughout the study, who had to sacrifice a lot to enable me to see this glorious day.
I want to reserve a special word of gratitude towards my lovely sister Rakhi di & Sameer Jija Ji and brother Bharat & Bhabhi Navita for their unconditional love, care and support. They always gave me the strength to overcome all the restlessness during this thesis work. I would like to thank my cutest and sweetest niece Maithlee, Diksha & Keshav for bringing joy during periods of stress. I must confess my thanks to my sister-in-laws (Veena di & Taruna) and brother-in-laws (Manoj Kalra & Sachin Ji) for their generous care, support and kind co-operation.

It is a matter of diligence to convey my thanks to my friend Dr. Suman Lata (di) for her affection as an elder sister, emotional support, suggestions and being a sharer of my delights and sorrows.

I am highly grateful to Dr. Ajay Bhargav for providing the seeds of one variety of Lathyrus sativus without which the application part of my thesis would not have been possible.

I want to thank my sweet friend Dr. Vinita Sharma for her suggestions, support, care and love during entire studies.

Vinay Narwal, Dr. Roma Rana Chauhan, Dr. Sandeep Yadav, Dr. Rachna Rawal, Dr. Nidhi Chauhan, Dr. Sheetal, Dr. Tusha di, Dr. Jagriti Narang, Namita, Sunny, Seema, and Govind are the persons who impelled and helped me raise in the entire course of study. They were always there to bring a smile on my face when I was worried. They made this journey delightful and memorable.

I gratefully acknowledge the financial assistance received from CSIR (Council of Scientific and Industrial Research) New Delhi for award of JRF/SRF during the course of this study.

I feel very much indebted to all those individuals and friends and colleagues, whose names are not listed here and who have assisted me directly or indirectly.

Bhauna Batra
