ACKNOWLEDGEMENTS

I express my deepest sense of gratitude to Dr. V. Parthasarathi, Reader in Physics, Bharathidasan University, for his able guidance, supervision and encouragement.

I am thankful to Dr. P.K. Ponnusamy, Professor and Head of the Physics Department, Bharathidasan University, who inspired me to take up the research work at the Department of Physics and provided all the necessary help to complete it.

I am much grateful to Professor H. Manohar, Department of Inorganic and Physical Chemistry, Indian Institute of Science, Bangalore, who rendered the maximum help during every summer vacation and in particular during April-June 1989 when I joined as a short-term research worker under his supervision at I.I.Sc., Bangalore. This enabled me to collect intensity data for some of the compounds and complete refinement of the crystal structures of many of the compounds. I am also grateful to Dr. K. Vyas, Department of I.P.C., I.I.Sc., Bangalore who volunteered all possible help. Thanks are due to the Director, I.I.Sc., and the Chairman, Department of I.P.C., I.I.Sc., Bangalore for permitting me to avail all the facilities there.
I am much thankful to Dr. S. Kannan, Reader in Chemistry, Indira Gandhi National Open University, New Delhi, for his consistent encouragement and useful discussions in the preparation of the thiophene compounds.

I am very much indebted to Professor M.A. Viswamitra, I.I.Sc., Bangalore, Professor E. Subramaniam and Professor K.K. Chakko, Department of Crystallography and Bio-Physics, University of Madras and Dr. M. Nethaji, Department of I.P.C., I.I.Sc. Bangalore, for their kind help in collecting intensity data and for useful suggestions and comments.

I thank Professor K. Venkatesan, Department of Organic Chemistry, I.I.Sc., Bangalore for his valuable suggestions and useful comments.

I thank the Director, Regional Sophisticated Instrumentation Centre, I.I.T., Madras and Dr. A. Babu Vargheese, R.S.I.C., I.I.T., Madras for their kind cooperation in collecting the data for some of the compounds.

My sincere thanks are due to:
Professor A. Natarajan, Professor M. Lakshmanan and other faculty members of the Physics Department, Bharathidasan University, Tiruchirapalli,
Dr. S. Natarajan, Reader in Physics, Madurai Kamaraj University,
Dr. P. Thomas Muthiah, Lecturer in Chemistry and
Dr. S. Selvaraj, Department of Physics, Bharathidasan University,
Mr. I.I. Mathews and Mr. M. Lakshminarayanan, Department of I.P.C., I.I.Sc., Bangalore,
Dr. M. Nallu and Mr. R. Kathiresan, Department of Chemistry and all my former colleagues at A.A. Govt. Arts College, Musiri,
Dr. T. Venkatesan, Department of Botany, Dr. J. Chellppa,
Department of Chemistry and all my colleagues at the Department of Physics, Periyar E.V.R. College, Tiruchirapalli,
Dr. Xavier Machado, Lecturer in Chemistry, St. Joseph's College, Tiruchirapalli and
Dr. A. Sebastiyan, Senior Lecturer in Chemistry, Urumu Dhanalakshmi College, Tiruchirapalli, for their encouragement and kind help on different occasions.

I thank the University Grants Commission, New Delhi for providing financial assistance under the Minor Research Project Scheme and the Director of Collegiate Education, Madras, Tamil Nadu for granting me permission to do part-time research work.
I thank Mr. G. Chokkalingam, Regional Engineering College, Tiruchirapalli for his neat execution of this thesis typing and Mr. Kanagasundaram, Department of Physics, Bharathidasan University for his excellent reprographical assistance.

Finally, I should like to thank my wife for all her emotional support and help at various stages of the thesis writing and also my two-year old baby, Veronica, for her patience.
