Acknowledgements

I would like to express my sincere gratitude to all those people who have made this work possible and because of whom my PhD experience has been one that I will cherish forever.

First and foremost my guide Dr. Narayan Pisharoty who has always shown trust in me and motivated me to achieve this goal. During the difficult times, he always pushed me and kept my morale high. In this journey, he played a very crucial role, sometime as a guide, as a friend and mainly as an advisor. I am fortunate enough to be associated with Dr. Narayan who always gave me the freedom to explore on my own and motivated me to do the things which I like to do. I hope one day I will have some qualities that my advisor has. I am really thankful to the gods for the company of a person like Dr. Narayan. I hope and firmly believe that every student and researcher will benefit from their association with him. My life will always draw inspiration from my Guide’s work and his life.

I would like to thank Dr. T.P. Singh, Director SIT, who has always shown trust in me. He has always motivated me to do good things. He has provided unqualified support for making this dissertation and journey possible. He was instrumental in giving me a good environment and facilities throughout this work. His work ethics and his systematic style of working will always have a positive impact on my life.

I would also like to thank Prof. Ayan Mahalanobis from IISER, Pune, for his guidance and suggestions wherever I needed them.

I would like to thank my M.Tech Students Nishchal Raval and Abhijit Patil without whom this journey would not have been possible. Their assistance, discussion and work always helped me to achieve the targets in time and their presence has always motivated me. I am lucky and thankful to god to have students like them. Their role in this journey is significant. Their hard work and sincerity made this journey a smooth ride.
I would also like to thank my sister in law Dr. Arti Khaparde and my brother Ashish Khaparde for bringing me into this profession and motivating and supporting me to achieve good things in life. Their role is invaluable in my life.

Most importantly none of this would have been possible without the love and support of my family. My father Vijay Bansod has always motivated me to improve myself and prayed always that I will achieve something big in my life. My mother Vidhya Bansod, with her efforts from my childhood, made me a person capable of surviving all odds. I am thankful to my parents for proper upbringing. I would also like to express my appreciation of the support of my sister Madhura Bansod.

Last but not least, my wife Rajeshree. She was always there cheering me up and she stood by me throughout this journey. When I was busy doing the work she has always managed my life and made it balanced and perfect. I am dedicating this thesis to my newborn son Raghav whose arrival in this world made my journey complete.

Thanks to the Almighty for always standing by me. I will always be indebted to you for that.
