ACKNOWLEDGEMENTS

I somehow always believe that this would be the easiest page to write. To my utter chagrin, I have been groping for the right words in past several days and still find the product not upto my satisfaction. There is always a lurking suspicion – Have I left out someone?

It has been my distinct honor and rare privilege to have work under the guidance and direct supervision of my revered supervisor Dr. Jyotsna Sen, Reader, Department of Radiodiagnosis, Pt. B.D.Sharma PGIMS, Rohtak. Her masterly guidance, constructive criticism, unremitting encouragement and extreme love & affection removed my bottlenecks. She acted as a beacon and provided the moral support that bolstered my sometimes flagging spirits. Words will, no doubt, fail to document her great contribution at every stage of my postgraduate career. She was always accessible and without her guidance this study would not have been possible. I will forever cherish the period during which I have worked with her.

I am grateful to my co-supervisor Dr. Sunita Singh, Reader, Department of Pathology, B.D.Sharma PGIMS, Rohtak, for her invaluable guidance and affectionate encouragement throughout the study.

I owe my special thanks to Dr. Rajeev Sen, Associate Professor, Department of Pathology, Pt. B.D.Sharma PGIMS, Rohtak, for his ever available help, healthy suggestions and valuable guidance during all the stages of this study.

My family members have always been my lighthouse. Their continuous support helped me, shaped me and molded me for whatever I am today. The debt I owe to my parents is supreme and can never be repaid.

I am wholeheartedly thankful to Dr. R.K.Airon, Professor and head, Department of Radiodiagnosis, Pt. B.D.Sharma PGIMS, Rohtak, for his able guidance.
I express my heartiest gratitude to Dr. R.K. Yadav, Associate professor and Dr. Sarita Magu, Associate professor, Department of Radiodiagnosis, Pt. B.D.Sharma PGIMS, Rohtak, for their constant encouragement and suggestions during the study.

I convey my thanks to all my friends and colleagues for their ever available help in whose company the work became a pleasure.

I acknowledge my thanks to M/s Mastak Computer Centre, Medical Mor, Rohtak, for excellent compilation and printing of this manuscript.

Last, but not the least, my sincere thanks to all the patients who were the subjects of this study.

(SUDHIR KATHURIA)
