ACKNOWLEDGEMENTS

It is with great pleasure and profound sense of reverence that I express a deep sense of gratitude and regards to my guide, Prof. A. K. Madan. Hard work, perseverance, and targeting nothing less than the “best” are keys to success; this I learnt from him. His principles and discipline are unmatched and a source of motivation for all those who get an opportunity to be associated with him.

I want to pay my sincere respect towards Dr. A. N. Kalia, Head, Department of Pharmaceutical Sciences, M. D. University, Rohtak, for his unstinting support towards completion of my dissertation.

My deep sense of appreciation and regards are due to Dr. Arun Nanda, and Dr. (Mts.) Sanju Nanda for their support throughout the course of this project.

My sincere gratitude is due to my seniors, colleagues and friends Harish, Vipin, Deepak, and Meenal, for their invaluable assistance and constant support. They were always there with me throughout this long and arduous journey. Heartfelt thanks are due to all of them.

I owe a special word of thanks to Dr. Anil Khurana for helping me in the design of computer programme. His friendly nature, helpful attitude, being present when needed most and dedication to work have been beyond comparison.

I would also like to thank the non-teaching staff of Department of Pharmaceutical Sciences, M. D. University, Rohtak, for their timely help and assistance whenever required.

A special and respectful thanks to Dr. (Mrs.) Madhu Madan, for her encouragement during the course of study.

This account would be incomplete without the mention of my beloved family members. I don’t want to demean the love and support of my wife, Deepti, by thanking her, but cannot bypass mentioning the open ended help, support, confidence and a driving force I always find in her. My nephews Aadvik and Arnav, who shared the time they deserved, very intelligently and understandingly, wouldn’t even
know enormously they have helped. The strong confidence of my parents once needs to be mentioned, who elevated me in the most testing times.

In the end, I want to thank the almighty for getting me to a stage to be able to write all this and pushing me towards the fulfillment of a long cherished dream.
