ACKNOWLEDGEMENTS

I owe considerable debt to the UGC entrusting upon me the Post Doctoral Research Award to work on a most talked about and challenging problem of Rainwater Harvesting.

I wish to record my sincere appreciation to the M.D. University, Rohtak especially to Dr. D.S. Dahiya, Principal erstwhile University College, for providing me the congenial environment and physical infrastructure for this research work. Similarly, I wish to thank the staff members of the library of India Meteorological Department, Delhi, Centre for Science and Environment, Delhi, to the officials of Groundwater Cell of Agriculture Department of Haryana, and to the library staff of Haryana Agriculture University, Hisar, who permitted access to their records.

I am indebted to my parents, wife Om Lata for timely help in proof reading and providing moral and spiritual encouragement and to Kanwal Jeet and Vishwa Jeet my sons for giving me support in all practical sense.

In the last, I am sincerely thankful to all those authors whose material has been quoted in the work.

(Inder Jeet)
