ACKNOWLEDGEMENTS

The satisfaction that accompanies the successful completion of any task would be incomplete without mentioning the people whose ceaseless co-operation made it possible, whose guidance and encouragements crown all the efforts with the success. Acknowledgements cannot be expressed by mere jugglery of words, but by feeling a deep sense of gratitude towards those whose help received is much greater than the words used for acknowledgement.

It is true that every mission needs a spirit of dedication and hard work, but more than anything else, it requires appropriate guidance to reach the goal at right time. I have the proud privilege to express my deep regards and profound sense of gratitude to Dr. S Dhamija (Asstt. professor, Department of Textile Technology, TIT&S, Bhiwani) for his valuable advice, able guidance, active co-operation and continuous inspiration throughout the course of my work. Without his proper guidance, it would have been impossible to complete this research work. I owe heartfelt regards and deep gratitude to Dr. V. K. Kothari (Professor in Department of Textile Technology, IIT, Delhi) for infusing the very soul in my thesis through his valuable supervision, guidance, encouragement and interest throughout. No words can suffice my feelings of immense gratitude to him.

I express my thanks to the director of the Institute Dr. Rishi P. Jamdagni, for his necessary permission for providing all facilities in time and to perform the work at different places. I am also thankful to Prof. R. K. Singh, Prof. S. K. Punj and Dr G. K. Tyagi for their kind support and help in taking up this project. I take this opportunity to thank the management of TIT&S mills and BTM mills, Bhiwani for providing necessary facilities and support for the preparation of yarn and fabric samples and their wet processing. I acknowledge the support rendered by Sh. S. K. Kapoor and Sh. P. D. Kaushik in making available all sorts of facilities in the TIT&S mills according to my schedule even at the odd hours. This work would not have started if I hadn't obtained the fibers (polyester and Viscose) of various cross-sections, lengths and finenesses. I am grateful to E I Dupont de Nemours Company, Chung-Shing Textile Company Ltd. Taiwan, Reliance industries and Bhiwani Textile Mills for providing me various fibres used in the study.

I thank Principal, Giani Zail Singh College of Engineering and Technology, Bathinda for allowing me to start and continue my research work. My heartfelt gratitude goes to Dr. Gursharan Singh, Professor and HOD and my colleague faculty members at
Department of Textile Engineering, GZSCET, Bathinda for their continuous support, cooperation and smoothening a lot of hurdles during the course of my work.

It would be greatly unthankful of me, if I don't express my grateful appreciation to staff members of all the laboratories of Department of Textile technology, IIT Delhi and Department of Textile Technology, TIT&S Bhiwani, for extending a helping hand whenever needed.

Keeping my composure through all these years would not have been possible without the aid of friends. I am grateful to all my friends at TIT & S Bhiwani and IIT Delhi for helping me keep a high morale whenever I needed. I would like to specially mention Harish Jain, Yogesh Khanna, Kaushik Bal and Jagdeeshan who have been such wonderful lab mates.

I feel highly obliged to my affectionate parents, parents-in-law, brother and Bhabhi ji. They have been great supporters in all the decisions I have taken and always had faith in me. Finally, I thank my best friend, my wife, Arana, for being my pillar of support, hope and love.

At the moment of submission of this thesis, I express my love and affection and gratefulness to the children of our family Gunjan, Neeraj and Harsh whose fresh, lively faces never let me down even during the moment of hardships and difficult situations and kept me always at high spirits.

In the end, I would like to thank all the wonderful people with whom I have come in contact during the years of my research.

Rajeev Kumar Varshney
