

LIST OF TABLES

Table No.	Description
2.1.	Sources and effects of different metals
2.2.	Biosorption of heavy metals by various algal species
2.3.	Biosorption of heavy metals by various bacterial species
2.4.	Biosorption of heavy metals by various fungal species
4.1.	The physico-chemical characteristic of wastewater
4.2.	Lagergren constants and correlation coefficients for the adsorption of Cr(VI) by different biosorbents
4.3.	Pseudo second-order rate constants and correlation coefficients for the adsorption of Cr(VI) by different biosorbents.
4.4.	Freundlich adsorption isotherm constants for the adsorption of Cr(VI) by different biosorbents
4.5.	Correlation coefficients for the Freundlich adsorption isotherm data for the adsorption of Cr(VI) by different biosorbents
4.6.	Langmuir adsorption isotherm constants for the adsorption of Cr(VI) by different biosorbents
4.7.	Correlation coefficients for the Langmuir adsorption isotherm data for the adsorption of Cr(VI) by different biosorbents
4.8.	Separation factor (R_L) values for the adsorption of Cr(VI) by different biosorbents
4.9.	Free energy change (ΔG) values for the adsorption of Cr(VI) by different biosorbents
4.10.	Lagergren constants and correlation coefficients for the adsorption of Zn(II) by different biosorbents
4.11.	Pseudo second-order rate constants and correlation coefficients for the adsorption of Zn(II) by different biosorbents.
4.12.	Freundlich adsorption isotherm constants for the adsorption of Zn(II) by different biosorbents

- 4.13. Correlation coefficients for the Freundlich adsorption isotherm data for the adsorption of Zn(II) by different biosorbents
- 4.14. Langmuir adsorption isotherm constants for the adsorption of Zn(II) by different biosorbents
- 4.15. Correlation coefficients for the Langmuir adsorption isotherm data for the adsorption of Zn(II) by different biosorbents
- 4.16. Separation factor (R_L) values for the adsorption of Zn(II) by different biosorbents
- 4.17. Free energy change (ΔG) values for the adsorption of Zn(II) by different biosorbents
- 4.18. Thomas model equation parameter (K_t) for sorption of Cr(VI)
- 4.19. Correlation coefficient (r^2) values for Thomas curves data of Cr(VI) adsorption
- 4.20. Thomas model equation parameter (K_t) for sorption of Zn(II)
- 4.21. Correlation coefficient (r^2) values for Thomas curves data of Zn(II) adsorption
- 4.22. Absorbance bands observed from the IR spectra of different non-immobilized *A. niger* biosorbents before and after adsorption
- 4.23. Absorbance bands observed from the IR spectra of different immobilized *A. niger* biosorbents before and after adsorption
- 4.24. Absorbance bands observed from the IR spectra of different non-immobilized *R. nigricans* biosorbents before and after adsorption
- 4.25. Absorbance bands observed from the IR spectra of different immobilized *R. nigricans* biosorbents before and after adsorption
- 4.26. Absorbance bands observed from the IR spectra of different non-immobilized *S. cerevisiae* biosorbents before and after adsorption
- 4.27. Absorbance bands observed from the IR spectra of different non-immobilized *S. cerevisiae* biosorbents before and after adsorption
- 4.28. Functional group assignments for the absorbance bands from the IR spectra of biosorbents
