

LIST OF ILLUSTRATIONS

Fig. No.	Description
4.1	Effect of particle size on the biosorption of Cr(VI) by non-immobilized <i>A. niger</i>
4.2	Effect of particle size on the biosorption of Cr(VI) by non-immobilized <i>R. nigricans</i>
4.3	Effect of particle size on the biosorption of Cr(VI) by non-immobilized <i>S. cerevisiae</i>
4.4	Effect of biomass percentage in beads on the biosorption of Cr(VI) by immobilized <i>A. niger</i>
4.5	Effect of biomass percentage in beads on the biosorption of Cr(VI) by immobilized <i>R. nigricans</i>
4.6	Effect of biomass percentage in beads on the biosorption of Cr(VI) by immobilized <i>S. cerevisiae</i>
4.7	Effect of pH on the biosorption of Cr (VI) by non-immobilized <i>A. niger</i>
4.8	Effect of pH on the biosorption of Cr (VI) by non-immobilized <i>R. nigricans</i>
4.9	Effect of pH on the biosorption of Cr (VI) by non-immobilized <i>S. cerevisiae</i>
4.10	Effect of pH on the biosorption of Cr (VI) by immobilized <i>A. niger</i>
4.11	Effect of pH on the biosorption of Cr (VI) by immobilized <i>R. nigricans</i>
4.12	Effect of pH on the biosorption of Cr (VI) by immobilized <i>S. cerevisiae</i>
4.13	Effect of biosorbent dose on the biosorption of Cr(VI) by non-immobilized <i>A. niger</i>
4.14	Effect of biosorbent dose on the biosorption of Cr(VI) by non-immobilized <i>R. nigricans</i>
4.15	Effect of biosorbent dose on the biosorption of Cr(VI) by non-immobilized <i>S. cerevisiae</i>
4.16	Effect of biosorbent dose on the biosorption of Cr(VI) by immobilized <i>A. niger</i>
4.17	Effect of biosorbent dose on the biosorption of Cr(VI) by immobilized <i>R. nigricans</i>

- 4.18 Effect of biosorbent dose on the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.19 Effect of contact time on the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.20 Effect of contact time on the biosorption of Cr(VI) by non-immobilized *R. nigricans*
- 4.21 Effect of contact time on the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.22 Effect of contact time on the biosorption of Cr(VI) by immobilized *A. niger*
- 4.23 Effect of contact time on the biosorption of Cr(VI) by immobilized *R. nigricans*
- 4.24 Effect of contact time on the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.25 Lagergren curve for the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.26 Lagergren curve for the biosorption of Cr(VI) by non-immobilized *R. nigricans*
- 4.27 Lagergren curve for the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.28 Lagergren curve for the biosorption of Cr(VI) by immobilized *A. niger*
- 4.29 Lagergren curve for the biosorption of Cr(VI) by immobilized *R. nigricans*
- 4.30 Lagergren curve for the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.31 Pseudo second-order curve for the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.32 Pseudo second-order curve for the biosorption of Cr(VI) by non-immobilized *R. nigricans*
- 4.33 Pseudo second-order curve for the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.34 Pseudo second-order curve for the biosorption of Cr(VI) by immobilized *A. niger*
- 4.35 Pseudo second-order curve for the biosorption of Cr(VI) by immobilized *R. nigricans*

- 4.36 Pseudo second-order curve for the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.37 Effect of initial ion concentration on the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.38 Effect of initial ion concentration on the biosorption of Cr(VI) by non-immobilized *R. nigricans*
- 4.39 Effect of initial ion concentration on the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.40 Effect of initial ion concentration on the biosorption of Cr(VI) by immobilized *A. niger*
- 4.41 Effect of initial ion concentration on the biosorption of Cr(VI) by immobilized *R. nigricans*
- 4.42 Effect of initial ion concentration on the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.43 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.44 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *R. nigricans*
- 4.45 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.46 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *A. niger*
- 4.47 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *R. nigricans*
- 4.48 Freundlich adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.49 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *A. niger*
- 4.50 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *R. nigricans*

- 4.51 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by non-immobilized *S. cerevisiae*
- 4.52 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *A. niger*
- 4.53 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *R. nigricans*
- 4.54 Langmuir adsorption isotherm plot for the biosorption of Cr(VI) by immobilized *S. cerevisiae*
- 4.55 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized acid treated *A. niger*
- 4.56 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized untreated *A. niger*
- 4.57 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized base treated *A. niger*
- 4.58 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized acid treated *R. nigricans*
- 4.59 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized untreated *R. nigricans*
- 4.60 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized base treated *R. nigricans*
- 4.61 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized acid treated *S. cerevisiae*
- 4.62 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized untreated *S. cerevisiae*
- 4.63 Adsorption/ desorption cycles for Cr(VI) uptake by immobilized base treated *S. cerevisiae*
- 4.64 Effect of particle size on the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.65 Effect of particle size on the biosorption of Zn(II) by non-immobilized *R. nigricans*

- 4.66 Effect of particle size on the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.67 Effect of biomass percentage in beads on the biosorption of Zn(II) by immobilized *A. niger*
- 4.68 Effect of biomass percentage in beads on the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.69 Effect of biomass percentage in beads on the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.70 Effect of pH on the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.71 Effect of pH on the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.72 Effect of pH on the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.73 Effect of pH on the biosorption of Zn(II) by immobilized *A. niger*
- 4.74 Effect of pH on the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.75 Effect of pH on the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.76 Effect of biosorbent dose on the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.77 Effect of biosorbent dose on the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.78 Effect of biosorbent dose on the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.79 Effect of biosorbent dose on the biosorption of Zn(II) by immobilized *A. niger*
- 4.80 Effect of biosorbent dose on the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.81 Effect of biosorbent dose on the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.82 Effect of contact time on the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.83 Effect of contact time on the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.84 Effect of contact time on the biosorption of Zn(II) by non-immobilized *S. cerevisiae*

- 4.85 Effect of contact time on the biosorption of Zn(II) by immobilized *A. niger*
- 4.86 Effect of contact time on the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.87 Effect of contact time on the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.88 Lagergren curve for the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.89 Lagergren curve for the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.90 Lagergren curve for the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.91 Lagergren curve for the biosorption of Zn(II) by immobilized *A. niger*
- 4.92 Lagergren curve for the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.93 Lagergren curve for the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.94 Pseudo second-order curve for the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.95 Pseudo second-order curve for the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.96 Pseudo second-order curve for the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.97 Pseudo second-order curve for the biosorption of Zn(II) by immobilized *A. niger*
- 4.98 Pseudo second-order curve for the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.99 Pseudo second-order curve for the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.100 Effect of initial ion concentration on the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.101 Effect of initial ion concentration on the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.102 Effect of initial ion concentration on the biosorption of Zn(II) by non-immobilized *S. cerevisiae*

- 4.103 Effect of initial ion concentration on the biosorption of Zn(II) by immobilized *A. niger*
- 4.104 Effect of initial ion concentration on the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.105 Effect of initial ion concentration on the biosorption of Zn(II) by immobilized *S.cerevisiae*
- 4.106 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.107 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.108 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.109 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by immobilized *A. niger*
- 4.110 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.111 Freundlich adsorption isotherm plot for the biosorption of Zn(II) by immobilized *S. cerevisiae*
- 4.112 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *A. niger*
- 4.113 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *R. nigricans*
- 4.114 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by non-immobilized *S. cerevisiae*
- 4.115 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by immobilized *A. niger*
- 4.116 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by immobilized *R. nigricans*
- 4.117 Langmuir adsorption isotherm plot for the biosorption of Zn(II) by immobilized *S. cerevisiae*

- 4.118 Adsorption/ desorption cycles for Zn(II) uptake by immobilized acid treated *A. niger*
- 4.119 Adsorption/ desorption cycles for Zn(II) uptake by immobilized untreated *A. niger*
- 4.120 Adsorption/ desorption cycles for Zn(II) uptake by immobilized base treated *A. niger*
- 4.121 Adsorption/ desorption cycles for Zn(II) uptake by immobilized acid treated *R. nigricans*
- 4.122 Adsorption/ desorption cycles for Zn(II) uptake by immobilized untreated *R. nigricans*
- 4.123 Adsorption/ desorption cycles for Zn(II) uptake by immobilized base treated *R. nigricans*
- 4.124 Adsorption/ desorption cycles for Zn(II) uptake by immobilized acid treated *S. cerevisiae*
- 4.125 Adsorption/ desorption cycles for Zn(II) uptake by immobilized untreated *S. cerevisiae*
- 4.126 Adsorption/ desorption cycles for Zn(II) uptake by immobilized base treated *S. cerevisiae*
- 4.127 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by acid treated *A. niger*
- 4.128 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by untreated *A. niger*
- 4.129 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by base treated *A. niger*
- 4.130 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by acid treated *R. nigricans*
- 4.131 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by untreated *R. nigricans*
- 4.132 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by base treated *R. nigricans*

- 4.133 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by acid treated *S. cerevisiae*
- 4.134 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by untreated *S. cerevisiae*
- 4.135 Effect of pH on the removal of Cr(VI) and Zn(II) from industrial effluent by base treated *S. cerevisiae*
- 4.136 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 20 cm
- 4.137 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 30 cm
- 4.138 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 40 cm
- 4.139 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 20 cm
- 4.140 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 30 cm
- 4.141 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 40 cm
- 4.142 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 20 cm
- 4.143 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 30 cm
- 4.144 Breakthrough curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 40 cm
- 4.145 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 20 cm
- 4.146 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 30 cm
- 4.147 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 40 cm

- 4.148 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 20 cm
- 4.149 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 30 cm
- 4.150 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 40 cm
- 4.151 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 20 cm
- 4.152 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 30 cm
- 4.153 Breakthrough curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 40 cm
- 4.154 Breakthrough curves for industrial effluent on the amount of biosorption of Cr(VI) and Zn(II) by *A. niger* for the bed height of 40 cm
- 4.155 Breakthrough curves for industrial effluent on the amount of biosorption of Cr(VI) and Zn(II) by *R. nigricans* for the bed height of 40 cm
- 4.156 Breakthrough curves for industrial effluent on the amount of biosorption of Cr(VI) and Zn(II) by *S. cerevisiae* for the bed height of 40 cm
- 4.157 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 20 cm
- 4.158 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 30 cm
- 4.159 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *A. niger* for the bed height of 40 cm
- 4.160 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 20 cm
- 4.161 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 30 cm
- 4.162 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *R. nigricans* for the bed height of 40 cm

- 4.163 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 20 cm
- 4.164 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 30 cm
- 4.165 Thomas curves for different flow rates on the amount of biosorption of Cr(VI) by *S. cerevisiae* for the bed height of 40 cm
- 4.166 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 20 cm
- 4.167 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 30 cm
- 4.168 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *A. niger* for the bed height of 40 cm
- 4.169 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 20 cm
- 4.170 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 30 cm
- 4.171 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *R. nigricans* for the bed height of 40 cm
- 4.172 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 20 cm
- 4.173 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 30 cm
- 4.174 Thomas curves for different flow rates on the amount of biosorption of Zn(II) by *S. cerevisiae* for the bed height of 40 cm
- 4.175 The FTIR spectrum pattern of base treated non-immobilized *A. niger* before biosorption
- 4.176 The FTIR spectrum pattern of base treated non-immobilized *A. niger* after Cr(VI) biosorption
- 4.177 The FTIR spectrum pattern of base treated non-immobilized *A. niger* after Zn(II) biosorption

- 4.178 The FTIR spectrum pattern of untreated non-immobilized *A. niger* before biosorption
- 4.179 The FTIR spectrum pattern of untreated non-immobilized *A. niger* after Cr(VI) biosorption
- 4.180 The FTIR spectrum pattern of untreated non-immobilized *A. niger* after Zn(II) biosorption
- 4.181 The FTIR spectrum pattern of acid treated non-immobilized *A. niger* before biosorption
- 4.182 The FTIR spectrum pattern of acid treated non-immobilized *A. niger* after Cr(VI) biosorption
- 4.183 The FTIR spectrum pattern of acid treated non-immobilized *A. niger* after Zn(II) biosorption
- 4.184 The FTIR spectrum pattern of base treated immobilized *A. niger* before biosorption
- 4.185 The FTIR spectrum pattern of base treated immobilized *A. niger* after Cr(VI) biosorption
- 4.186 The FTIR spectrum pattern of base treated immobilized *A. niger* after Zn(II) biosorption
- 4.187 The FTIR spectrum pattern of untreated immobilized *A. niger* before biosorption
- 4.188 The FTIR spectrum pattern of untreated immobilized *A. niger* after Cr(VI) biosorption
- 4.189 The FTIR spectrum pattern of untreated immobilized *A. niger* after Zn(II) biosorption
- 4.190 The FTIR spectrum pattern of acid treated immobilized *A. niger* before biosorption
- 4.191 The FTIR spectrum pattern of acid treated immobilized *A. niger* after Cr(VI) biosorption
- 4.192 The FTIR spectrum pattern of acid treated immobilized *A. niger* after Zn(II) biosorption

- 4.193 The FTIR spectrum pattern of base treated non-immobilized *R. nigricans* before biosorption
- 4.194 The FTIR spectrum pattern of base treated non-immobilized *R. nigricans* after Cr(VI) biosorption
- 4.195 The FTIR spectrum pattern of base treated non-immobilized *R. nigricans* after Zn(II) biosorption
- 4.196 The FTIR spectrum pattern of untreated non-immobilized *R. nigricans* before biosorption
- 4.197 The FTIR spectrum pattern of untreated non-immobilized *R. nigricans* after Cr(VI) biosorption
- 4.198 The FTIR spectrum pattern of untreated non-immobilized *R. nigricans* after Zn(II) biosorption
- 4.199 The FTIR spectrum pattern of acid treated non-immobilized *R. nigricans* before biosorption
- 4.200 The FTIR spectrum pattern of acid treated non-immobilized *R. nigricans* after Cr(VI) biosorption
- 4.201 The FTIR spectrum pattern of acid treated non-immobilized *R. nigricans* after Zn(II) biosorption
- 4.202 The FTIR spectrum pattern of base treated immobilized *R. nigricans* before biosorption
- 4.203 The FTIR spectrum pattern of base treated immobilized *R. nigricans* after Cr(VI) biosorption
- 4.204 The FTIR spectrum pattern of base treated immobilized *R. nigricans* after Zn(II) biosorption
- 4.205 The FTIR spectrum pattern of untreated immobilized *R. nigricans* before biosorption
- 4.206 The FTIR spectrum pattern of untreated immobilized *R. nigricans* after Cr(VI) biosorption
- 4.207 The FTIR spectrum pattern of untreated immobilized *R. nigricans* after Zn(II) biosorption

- 4.208 The FTIR spectrum pattern of acid treated immobilized *R. nigricans* before biosorption
- 4.209 The FTIR spectrum pattern of acid treated immobilized *R. nigricans* after Cr(VI) biosorption
- 4.210 The FTIR spectrum pattern of acid treated immobilized *R. nigricans* after Zn(II) biosorption
- 4.211 The FTIR spectrum pattern of base treated non-immobilized *S. cerevisiae* before biosorption
- 4.212 The FTIR spectrum pattern of base treated non-immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.213 The FTIR spectrum pattern of base treated non-immobilized *S. cerevisiae* after Zn(II) biosorption
- 4.214 The FTIR spectrum pattern of untreated non-immobilized *S. cerevisiae* before biosorption
- 4.215 The FTIR spectrum pattern of untreated non-immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.216 The FTIR spectrum pattern of untreated non-immobilized *S. cerevisiae* after Zn(II) biosorption
- 4.217 The FTIR spectrum pattern of acid treated non-immobilized *S. cerevisiae* before biosorption
- 4.218 The FTIR spectrum pattern of acid treated non-immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.219 The FTIR spectrum pattern of acid treated non-immobilized *S. cerevisiae* after Zn(II) biosorption
- 4.220 The FTIR spectrum pattern of base treated immobilized *S. cerevisiae* before biosorption
- 4.221 The FTIR spectrum pattern of base treated immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.222 The FTIR spectrum pattern of base treated immobilized *S. cerevisiae* after Zn(II) biosorption

- 4.223 The FTIR spectrum pattern of untreated immobilized *S. cerevisiae* before biosorption
- 4.224 The FTIR spectrum pattern of untreated immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.225 The FTIR spectrum pattern of untreated immobilized *S. cerevisiae* after Zn(II) biosorption
- 4.226 The FTIR spectrum pattern of acid treated immobilized *S. cerevisiae* before biosorption
- 4.227 The FTIR spectrum pattern of acid treated immobilized *S. cerevisiae* after Cr(VI) biosorption
- 4.228 The FTIR spectrum pattern of acid treated immobilized *S. cerevisiae* after Zn(II) biosorption

A petri dish containing a bacterial culture on a solid medium, showing a dense, uniform, yellowish-white growth. The dish is centered on a teal background.

CHAPTER-1
INTRODUCTION
