ACKNOWLEDGEMENTS

The author owes the deepest sense of gratitude to her supervisors Dr. P. P. Singh, Professor, Department of Chemistry, Maharshi Dayanand University, Rohtak and to Dr. O. P. Yadav, Associate Professor, Department of Chemistry & Biochemistry, Haryana Agricultural University, Hisar for their superb guidance, everlasting source of inspiration and encouragement throughout the work. The expression of author's gratitude in words to them will ever be inadequate.

The author expresses her heartfelt and sincere thanks to Professor Randhir Singh, Professor S. K. Arora and Professor K. S. Dhindsa, Department of Chemistry and Biochemistry, HAU, Hisar and also to Professor K. S. Sharma and Professor O. P. Aggarwal, Department of Chemistry, M. D. U. Rohtak for their help in all academic and administrative matters. She is highly thankful to the authorities of Haryana Agricultural University for granting her the academic leave to undertake this study.

The author expresses her sincere thanks to the labmates Dr. Sanjeev Maken, Renu and Meenu for their all round help. She is also highly grateful to her colleagues Dr. (Mrs.) Veena Sawhney and Dr. (Mrs.) Ramesh Mehta for constant encouragement.

And finally to her husband, Dr. G. R. Anand and to their kids Shuchita and Saurabh to whom this thesis is dedicated, she owes a great deal who motivated and encouraged her at every step to complete this piece of work.

KAMLESH ANAND
