

INDEX

| | |
|--|-----------|
| INDEX..... | i-iv |
| LIST OF FIGURES | v-ix |
| LIST OF TABLES..... | x-xii |
| LIST OF ABBREVIATIONS..... | xiii |
| 1. INTRODUCTION..... | 1 |
| 1.1 INCLUSION COMPOUNDS..... | 1 |
| 1.2 BRIEF HISTORY..... | 3 |
| 1.3 TERMS AND CLASSIFICATIONS..... | 4 |
| 1.4 SIGNIFICANCE /APPLICATIONS OF INCLUSION COMPOUNDS..... | 7 |
| 1.5 VARIOUS ADDUCTORS..... | 10 |
| 1.6 HELICAL INCLUSION COMPOUNDS..... | 13 |
| 1.6.1 Urea, thiourea and selenourea inclusion compounds..... | 14 |
| 1.6.2 Deoxycholeic acid and derivatives..... | 15 |
| 1.6.3 Tri-o-thymodite inclusion compounds..... | 15 |
| 1.6.4 Amylose inclusion compounds..... | 16 |
| 1.7 APPLICATIONS OF INCLUSION COMPOUNDS IN DRUG FORMULATIONS..... | 16 |
| 1.8 UREA AS AN ADDUCTOR..... | 22 |
| 1.9 THE PROPOSED TECHNIQUE..... | 24 |
| 2. LITERATURE REVIEW..... | 29 |
| 3. UREA AS AN ADDUCTOR..... | 67 |
| 3.1 UREA AS AN ORGANIC COMPOUND..... | 67 |
| 3.2 UREA AS A PHYSIOLOGICAL SUBSTANCE..... | 68 |
| 3.3 UREA AS A COMMERCIAL CHEMICAL..... | 69 |
| 3.4 UREA AS A CRYSTAL..... | 71 |
| 3.5 UREA AS AN ADDUCTOR..... | 73 |
| 3.5.1 Fundamental structure of urea inclusion compounds..... | 74 |
| 3.5.2 Formation of urea inclusion compounds..... | 78 |
| 3.5.3 Crystal morphology of urea inclusion compounds..... | 82 |
| 3.5.4 Structural properties of urea inclusion compounds..... | 83 |
| 3.5.5 General applications of urea inclusion compounds..... | 88 |
| 3.6 CONCLUSION | 91 |

| | |
|--|------------|
| 4. DEVELOPMENT OF MATHEMATICAL MODELS FOR PREDICTION OF ADDUCTABILITY IN UREA..... | 92 |
| 4.1 INTRODUCTION..... | 92 |
| 4.1.1 <i>Classification of topological descriptors</i> | 93 |
| 4.1.2 <i>Applications of topological descriptors</i> | 95 |
| 4.2 ADDUCTABILITY IN UREA..... | 95 |
| 4.3 METHODOLOGY..... | 97 |
| 4.3.1 <i>Calculation of topological descriptors</i> | 97 |
| 4.3.2 <i>Development of topological models for prediction of adductability of branched organic compounds in urea</i> | 100 |
| 4.3.3 <i>Development of topological models for prediction of adductability of cyclic substituted organic compounds in urea</i> | 101 |
| 4.4 DATA ANALYSIS..... | 101 |
| 4.4.1 <i>Topological models for prediction of adductability of branched aliphatic compounds</i> | 101 |
| 4.4.2 <i>topological models for prediction of adductability of substituted cyclic organic compounds</i> | 109 |
| 4.5 CONCLUSION..... | 114 |
| 5. SELECTION OF SUITABLE DRUG CANDIDATES..... | 115 |
| MONOGRAPHS OF SELECTED DRUGS..... | 123 |
| 5.1 AMILORIDE HYDROCHLORIDE..... | 123 |
| 5.2 ENALAPRIL MALEATE..... | 129 |
| 5.3 GLIPIZIDE..... | 136 |
| 5.4 <i>CIS</i> -RETINOIC ACID..... | 141 |
| 5.5 NICORANDIL..... | 147 |
| 6. PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS..... | 154 |
| 6.1 PREPARATION OF INCLUSION COMPOUNDS..... | 154 |
| 6.1.1 <i>Determination of minimum anchor length for the selected drugs</i> | 154 |
| 6.1.2 <i>Use of Rapidly Adductible Endocytes</i> | 157 |
| 6.1.3 <i>Method of preparation of urea inclusion compounds</i> | 158 |
| 6.2 CHARACTERIZATION OF UREA INCLUSION COMPOUNDS..... | 159 |
| 6.2.1 <i>Infrared Spectroscopy</i> | 159 |
| 6.2.2 <i>Differential Scanning Calorimetry</i> | 164 |
| 6.2.3 <i>Polycrystalline X-Ray Diffraction</i> | 166 |
| 6.3 PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS OF AMILORIDE HYDOCHLORIDE..... | 168 |
| 6.4 PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS OF ENALAPRIL MALEATE..... | 172 |

| | |
|---|------------|
| 6.5 PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS OF GLIPIZIDE..... | 175 |
| 6.6 PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS OF CIS-RETINOIC ACID..... | 178 |
| 6.7 PREPARATION AND CHARACTERIZATION OF UREA INCLUSION COMPOUNDS OF NICORANDIL..... | 182 |
| 6.8 CONCLUSION..... | 186 |
| 7. THERMAL ANALYSIS OF UREA INCLUSION COMPOUNDS..... | 187 |
| 7.1 INTRODUCTION..... | 187 |
| 7.2 CALORIMETRIC ANALYSIS..... | 188 |
| 7.2.1 Urea co-inclusion compounds of Amiloride Hydrochloride..... | 191 |
| 7.2.2 Urea co-inclusion compounds of Enalapril maleate..... | 194 |
| 7.2.3 Urea co-inclusion compounds of Glipizide..... | 196 |
| 7.2.4 Urea co-inclusion compounds of Cis-RA..... | 199 |
| 7.2.5 Urea co-inclusion compounds of Nicorandil..... | 201 |
| 7.3 THERMAL ANALYSIS OF UREA INCLUSION COMPOUNDS | 203 |
| 7.3.1 Method..... | 204 |
| 7.3.2 Urea co-inclusion compounds of Amiloride Hydrochloride..... | 204 |
| 7.3.3 Urea co-inclusion compounds of Enalapril maleate..... | 206 |
| 7.3.4 Urea co-inclusion compounds of Glipizide..... | 209 |
| 7.3.5 Urea co-inclusion compounds of Cis-RA..... | 211 |
| 7.3.6 Urea co-inclusion compounds of Nicorandil..... | 213 |
| 7.4 CONCLUSION..... | 215 |
| 8. DEVELOPMENT OF MATHEMATICAL MODELS FOR PREDICTION OF HEAT OF DECOMPOSITION OF UREA INCLUSION COMPOUNDS..... | 216 |
| 8.1 INTRODUCTION..... | 216 |
| 8.2 METHODOLOGY..... | 217 |
| 8.2.1 Calculations of topological indices..... | 217 |
| 8.2.1 Model design..... | 218 |
| 8.3 RESULT AND DISCUSSIONS..... | 220 |
| 9. INFLUENCE OF INCLUSION OF DRUGS IN UREA ON DISSOLUTION PROFILE..... | 225 |
| 9.1 INTRODUCTION..... | 225 |
| 9.2 DISSOLUTION PROFILES OF DRUGS AND THEIR UREA INCLUSION COMPOUNDS..... | 228 |
| 9.2.1 Dissolution profile of amiloride hydrochloride and its urea inclusion compound..... | 228 |
| 9.2.2 Dissolution profile of enalapril maleate and its urea inclusion compound..... | 231 |
| 9.2.3 Dissolution profile of glipizide and its urea inclusion compound..... | 234 |

| | |
|---|------------|
| 9.2.4 Dissolution profile of <i>cis</i> -Retinoic Acid and its urea inclusion compound..... | 237 |
| 9.3 CONCLUSION..... | 240 |
| 10. CONTENT UNIFORMITY..... | 241 |
| 10.1 INTRODUCTION..... | 241 |
| 10.2 CONTENT UNIFORMITY OF UREA INCLUSION COMPOUNDS..... | 242 |
| 10.2.1 Inclusion compounds of amiloride hydrochloride..... | 242 |
| 10.2.2 Inclusion compounds of enalapril maleate..... | 243 |
| 10.2.3 Inclusion compounds of glipizide..... | 244 |
| 10.2.4 Inclusion compounds of <i>cis</i> -RA..... | 245 |
| 10.2.5 Inclusion compounds of nicorandil..... | 246 |
| 10.3 CONCLUSION..... | 247 |
| 11. INFLUENCE OF INCLUSION ON PHOTOSTABILITY..... | 248 |
| 11.1 PHOTOSTABILITY OF DRUGS..... | 248 |
| 11.2 PHOTOSTABILITY STUDIES..... | 251 |
| 11.3 CIS-RETINOIC ACID: A PHOTSENSITIVE DRUG..... | 253 |
| 11.4 PHOTOSTABILITY TESTING OF ISOTRETINOIN AND ITS UREA INCLUSION COMPOUND..... | 256 |
| 11.4.1 Method..... | 256 |
| 11.4.2 Result and Discussion..... | 256 |
| 11.5 CONCLUSION..... | 262 |
| 12. INFLUENCE OF INCLUSION IN UREA ON SENSITIVITY TOWARDS MOISTURE..... | 263 |
| 12.1 INTRODUCTION..... | 263 |
| 12.2 HYGROSCOPIC NATURE OF UREA..... | 265 |
| 12.3 NICORANDIL- A MOISTURE SENSITIVE DRUG..... | 265 |
| 12.4 DETERMINATION OF SENSITIVITY TOWARDS MOISTURE..... | 266 |
| 12.4.1 Moisture sorption study | 266 |
| 12.4.2 Influence on inclusion on moisture sensitivity of nicorandil..... | 266 |
| 12.5 RESULT AND DISCUSSION..... | 269 |
| 12.5.1 Stability of urea in tetragonal and hexagonal forms..... | 269 |
| 12.5.2 Moisture sensitivity of nicorandil and its urea inclusion compound.... | 272 |
| 12.6 CONCLUSION..... | 274 |
| 13. SUMMARY AND CONCLUSION..... | 275 |
| 14. REFERENCES..... | 289 |
| 15. APPENDIX: REPRINTS OF PUBLICATIONS | |
