ACKNOWLEDGEMENTS

It is indeed impossible for me to be explicit about the extent of my gratitude to my guide, Dr. D. G. Dhuley, Professor of Physical Chemistry, Marathwada University, Aurangabad. I could not have started the work at all and without his perpetual inspiration I could never have finished it.

This work was undertaken during the tenure of Jr. Research Fellowship awarded to me by the Council of Scientific and Industrial Research, New Delhi. I express my sincere appreciation of the financial assistance given to me. My thanks are also due to Marathwada University, Aurangabad, for providing essential research facilities.

I will be failing in my duty if I do not acknowledge the valuable help of my parents.

(Miss M.P. JADHAV)
