

List of Tables

Table 4.1	Number of packet transfer for varying parties	75
Table 4.2	Probability of Data Security by varying packets	76
Table 4.3	Probability of data security by varying anonymizers	77
Table 4.4	Probability of joint Malicious Conduct by Anonymizers in <i>JCRA</i>	78
Table 4.5	Probability of collision between malicious anonymizer and parties in <i>JCRA</i>	80
Table 4.6	Probability of collision between Anonymizers and TTP	82
Table 4.7	Number of packet transfer for varying parties	89
Table 4.8	Probability of Data Security by varying packets	90
Table 4.9	Probability of data security by varying anonymizers	92
Table 4.10	Probabilistic result of <i>DRSS</i> by increasing number of malicious anonymizers	93
Table 4.11	Test result by increasing pseudo-random number and malicious anonymizers	94
Table 5.1	Joint Malicious conduct by Anonymizer and TTP	108
Table 5.2	Collision between malicious parties and anonymizers	109
Table 5.3	Comparative Study of Secure Sum Protocols	116
Table 6.1	Computation load of <i>JCRA</i> protocol	130
Table 6.2	Computation load of <i>DRSS</i> protocol	131
Table 6.3	Computation load of <i>JCAE</i> Protocol	132
Table 6.4	Test results of <i>JCRA</i> by increasing parties	133
Table 6.5	Test results of <i>JCRA</i> by increasing packets	134

Table 6.6	Test results of <i>JCRA</i> by increasing anonymizers	136
Table 6.7	Test results of <i>DRSS</i> by increasing number of party	137
Table 6.8	Test results of <i>DRSS</i> by increasing number of packets as well as parties	139
Table 6.9	Test results of <i>DRSS</i> by increasing number of anonymizers	140
Table 6.10	Test results of <i>JCAE</i> by increasing parties	141
Table 6.11	Test results of <i>JCAE</i> by increasing packets	142
Table 6.12	Test results of <i>JCAE</i> by increasing anonymizers	143
Table 7.1	Outcome of Research	149
