

LIST OF TABLES

Table No.	Contents	Page No.
1	Age range and average age level for undergraduate and Post graduate level students.	65
2	Number of male and female students among undergraduate and post graduate students	66
3	Number of students belonging to different category of caste among undergraduate and Post graduate students.	67
4	Number of fathers related to different occupation of the students among undergraduate and post graduate students	69
5	Percentage of mothers related to different category of occupation of undergraduate and post graduate students	70
6	Educational qualification of the fathers of students of both undergraduate and post graduate level.	71
7	Percentage of mothers belonging in different category of educational level of undergraduate and post graduate students	72
8	The family income of the students per month in three different categories of Undergraduate and Post graduate students	73
9	Percentage of students having different numbers of sibling of Undergraduate and Post graduate students.	74
10	Students' family members in category A and B of Undergraduate and post graduate students	75
11	Numbers of students belonging to different stream of education in undergraduate and Post graduate level	76
12	Number of students having different medium of language in Undergraduate and Post graduate level	77
13	Numbers of students having different types of extra activities and hobbies in both Undergraduate and Post graduate level	78
14	Mean , SD and t test values on Positive psychological capital and four dimensions of it among UG and PG students	80
15	Mean and standard deviation values on psychological well-being variable and t values between undergraduate and post graduate students.	83
16	Mean and standard deviation values on creativity variable and t values between undergraduate and post graduate students.	85

17	Pearson product moment correlation coefficient values between Positive psychological capital and psychological well-being among UG students	87
18	Pearson product moment correlation coefficient values between positive psychological capital and psychological well-being and dimensions of it among PG students	89
19	Pearson product moment correlation coefficient values between positive psychological capital and creativity among UG students	91
20	Pearson product moment correlation coefficient values between positive psychological capital and creativity among PG students	92
21	Regression analysis between Positive psychological Capital and four dimensions of it and Psychological Well-being among UG students	94
22	Regression analysis between Positive psychological Capital and four dimensions of it and positive relation with others dimension of Psychological Well-being among UG students	96
23	Regression analysis between Positive psychological Capital and four dimensions of it and autonomy dimension of Psychological Well-being among UG students	97
24	Regression analysis between Positive psychological Capital and its four dimensions and environmental mastery dimension of Psychological Well-being among UG students	97
25	Regression analysis between Positive psychological Capital and four dimensions and personal growth dimension of Psychological Well-being among UG students	98
26	Regression analysis between Positive psychological Capital and four dimensions and purpose in life dimension of Psychological Well-being among UG students	99
27	Regression analysis between Positive psychological Capital and four dimensions and self-acceptance dimension of Psychological Well-being among UG students	100
28	Regression analysis between Positive psychological Capital and four dimensions of it and Psychological well-being among PG students	101
29	Regression analysis between Positive psychological Capital and four dimensions of it and positive relation with others dimension of psychological well-being among PG students	103
30	Regression analysis between Positive psychological Capital and four dimensions of it and autonomy dimension of Psychological well-being among PG students	104

31	Regression analysis between Positive psychological Capital and four dimensions of it and environmental mastery dimension of Psychological well-being among PG students	104
32	Regression analysis between Positive psychological Capital and four dimensions of it and personal growth dimension of Psychological well-being among PG students	105
33	Regression analysis between Positive psychological Capital and four dimensions of it and purpose in life dimension of Psychological well-being among PG students	106
34	Regression analysis between Positive psychological Capital and four dimensions of it and self acceptance dimension of Psychological well-being among PG students	106
35	Regression analysis between Positive psychological Capital and four dimensions of it and Creativity among UG students	108
36	Regression analysis between Positive psychological Capital and four dimensions of it and Creativity among PG students	110
