

CONTENTS

Chapter	Title	Page
1.0	PRIORITY QUEUEING MODELS: INTRODUCTION AND SUMMARY	.. 1
1.1	Introduction	.. 2
1.2	Concepts and Definitions	.. 2
1.3	Review of Literature	.. 14
1.4	Overview of Chapters	.. 27
2.0	BASIC ANALYSES OF TWO PRIORITY QUEUEING MODELS	.. 31
2.1	Introduction	.. 32
2.2	Basic analysis of a particular single server feedback preemptive priority queueing model	.. 32
2.3	Basic analysis of a priority queueing model involving alternate service pattern	.. 46
3.0	POINT AND INTERVAL ESTIMATION ASPECTS OF TWO MANY-SERVER PRIORITY QUEUEING MODELS	.. 54
3.1	Introduction	.. 55
3.2	Maximum likelihood and interval estimation aspects of a two-server nonpreemptive priority queueing model	.. 56
3.3	Maximum likelihood and interval estimation aspects of a C-server nonpreemptive priority queueing model	.. 65
4.0	ESTIMATION AND TESTING OF HYPOTHESES ASPECTS OF CERTAIN NONPREEMPTIVE PRIORITY QUEUEING MODELS	.. 75
4.1	Introduction	.. 76

4.2	Estimation and testing of hypothesis aspects of a finite capacity priority queueing model	.. 77
4.3	Estimation aspects of a multiple finite source nonpreemptive priority queueing model	.. 87
5.0	OPTIMAL DESIGN AND CONTROL ASPECTS OF CERTAIN PRIORITY QUEUEING MODELS	.. 92
5.1	Introduction	.. 93
5.2	Optimal design aspects of a priority queueing model involving multiple service facilities	.. 94
5.3	Optimal control aspects of a single server priority queueing model involving general service times	.. 102
6.0	OPTIMALITY ASPECTS OF CERTAIN NONPREEMPTIVE PRIORITY QUEUEING MODELS	.. 111
6.1	Introduction	.. 112
6.2	Optimality aspects of a finite capacity nonpreemptive priority queueing model	.. 112
6.3	Optimality aspects of a finite source nonpreemptive priority queueing model	.. 118
	APPENDIX: Computer programmes	.. 128
