ACKNOWLEDGEMENTS

I would like to express my sincere appreciation and gratitude to many people who directly or indirectly helped me in various phases of my research work. I am particularly indebted to my Supervisor, Dr. Madan Mohan Das for his valuable guidance and encouragement during the course of my study. His constant encouragements, motivation and ever-optimistic attitude have been my prime source of inspiration. I am ever grateful to Dr. Bibha Das Saikia, Principal, Assam Engineering College, Guwahati for her invaluable suggestions and providing necessary technical support in carrying out my research work. I am also highly grateful to Prof. Nripendra Nath Patwary, Head, Civil Engineering Department and Dean, Faculty of Engineering, Gauhati University, for providing me necessary assistance and support in my work.

This research work would not have been possible without the active participation of five of my brilliant post-graduate students who worked exclusively on this topic as a partial fulfillment of their M.E. dissertation works. They are Mr. Anubhav Dehingia, Mr. Kishore Sharma, Ms. Jayshree Malakar, Mr. Mukut Deka and Ms. Rumee Thakuria. Ample reference to their research work contributing to this study may be found throughout this thesis. Dr. Sumeedha Chakma and Mr. Diganta Barman who also worked under my guidance towards their M.E. dissertations on this field of infiltration studies need special mention. I am highly grateful to many persons who helped me in procuring many essential research papers from various sources within the country. Notable among them are Mr. Damboru Dhar Medhi, Mr. Lakhee Prasad Saikia and Dr. Mimi Das Saikia of Royal Group of Institutions; Mr. Bhaskar Jyoti Das; Dr. Utpal Mishra of Assam Engineering College. I am also grateful to Dr. Arup Kumar Sharma,
Professor, IIT, Guwahati for his constructive remarks and suggestions and allowing me an easy access to the library of IIT, Guwahati.

Valuable suggestions, assistance and fresh perspectives offered by my friends Dr. Niranjan Panigrahy, Mr. Sashi Ranjan Kumar and Dr. A. Bandopadhay of National Institute of Hydrology, and by Mr. Pulakav Chowdhury of ICAR, Meghalaya have been very encouraging and useful in this study. I am also thankful to the technical staff of the Civil Engineering Department of Assam Engineering College who helped me in various stages of my work. In this regard, the assistance and support provided by Mr. Tafique Ali Dewan, Ms. Namita Goswami, Mr. Soneswar Das, Mr. Kumar and by Mr. Jogesh Das is gratefully acknowledged.

I am thankful as well as grateful to my wife Snigdha and daughter Sneha for being considerate and supportive throughout this work. My special thanks are due to my son Shantom for helping me in drawing certain diagrams in this thesis. Last but not the least, I am grateful to Madam Lalita Das, wife of my honourable Guide, for being encouraging and supportive in spite of being disturbed at odd hours of time throughout the entire course of this study.

(Mrinal Kumar Borah)

1. Former post-graduate students of Assam Engineering College
2. Former post-graduate students of AEC and currently in NIT, Allahabad and in ISRO, Meghalaya, respectively
3. Former research scholar in IIT, Delhi and currently with Central Water Commission
4. Former post-graduate student of AEC and AIT, Thailand
