ACKNOWLEDGEMENT

At the outset, I express my most sincere gratitude to Dr. A.K. Handique, Professor, Department of Biotechnology, Gauhati University for his constant guidance, inspiration and meticulous supervision in every step while preparing this piece of work. It is his constant encouragement and precise help which has brought this little work to light.

I would like to express my deepest respect and gratitude to Prof. P.J. Handique, Head of the Department of Biotechnology, Gauhati University for allowing me to select and undertake this topic for my PhD thesis.

It is my privilege and honor to express my sincere gratitude and profound indebtedness to other respected faculty members of the Department of Biotechnology, Gauhati University Prof. M.C. Kalita, Prof. G. U. Ahmed, Prof. R. Bharali, Prof. S. Sharma, Prof. M Deka, Dr. H.K. Sharma, Assistant Professor and Dr. S. Bose, Assistant Professor, for their constant help and valuable suggestions.

It is also my privilege and honor to acknowledge my profound and sincere gratitude to Dr. S. P. Mehtre, Associate Professor, Department of Genetics and Plant Breeding, Marathwada University, Parbhani, Maharashtra for helping me with my experiments.

My sincere and heartfelt thanks to Dr. P. M. Gaur, Senior Scientist, Chickpea Breeding, ICRISAT, Hyderabad for providing me the plant materials and valuable suggestions.

I also thank Dr. V. M. Prasanna, CIMMYT, Mexico and Dr. P. Verma, Scientist IV, NIPGR, New Delhi for their help and valuable suggestions.

I am indebted to Dr. B. Tanti, Senior Lecturer, Department of Botany, Gauhati University and Prof. D.K. Sharma, Co-ordinator, Bioinformatics Centre, Gauhati University for their constant help and encouragement.
It would be my ungratefulness if I do not acknowledge the constant and sincere support of my friends Dr. S.K. Gulia, Dr. Devvart Yadav, Dr. Santosh Deshpande, Mohan Bhagwat, Pradip Mehta and Dr. N.V. Kumar, who were always there to encourage me whenever I needed.

I thank my seniors Dr. Parama Saikia, Assistant Professor in Biotechnology, University of Hyderabad and Dr. Nayan Jyoti Sharma, Post Doctoral Fellow, Washington University, School of Medicine, for their constant help and encouragement.

I also thank Ranjit Das, Lecturer, Department of Botany, Pragjyotish College, Guwahati for his various suggestions.

My labmates Rajiv, Ellora, Nitumoni, Barnali, Nilakshi, Jayanta, Abinash and Saurabh deserve special mention for the much needed encouragement and help throughout the course of the study.

I am thankful to the office staff with special mention of Mr. Bipulananda Das and Mr. Ahmed for their unforgettable help. I am also grateful to Akhim and Prabin for their support at various levels during my study.

I would like to avail this opportunity to express my deepest gratitude to my parents for shaping me into what I am today.

I would also like to avail this opportunity to express my sincerest gratitude to my wife, Dr. Jyotismita Deka for her constant support, help and valuable suggestions not only during this thesis, but in every step of life.

I would like to thank my sister and brother in law for their constant encouragement.

I would also like to thank my mother in law for her constant encouragement.
