Abstract

|                                                         |           |
|---------------------------------------------------------|-----------|
| <b>Chapter I</b>                                        | <b>1</b>  |
| General Introduction                                    |           |
| 1.1 Introduction                                        | 1         |
| 1.2 Basic principles of structure determination         | 2         |
| 1.3 Methods for the solution of phase problem           | 6         |
| 1.4 Methods for determination of crystal structures     | 13        |
| 1.5 Refinement of structure                             | 18        |
| 1.6 Experimental procedure                              | 22        |
| 1.7 Corrections to intensities                          | 23        |
| 1.8 Scaling of data                                     | 28        |
| 1.9 Computer programs                                   | 29        |
| 1.10 Aim and Scope of this thesis                       | 32        |
| 1.11 Reference                                          | 33        |
| <br>                                                    |           |
| <b>Chapter II</b>                                       | <b>38</b> |
| Crystal structure analysis of three different chalcones |           |
| 2.1 Introduction                                        | 38        |
| 2.2. Experimental details                               | 40        |
| 2.2.1 Procedure for synthesis of chalcones              | 40        |
| 2.2.2 X-ray crystallography                             | 42        |
| 2.3. Results and Discussion                             | 45        |
| 2.3.1. The main Chain                                   | 66        |
| 2.3.2 The phenyl rings                                  | 67        |
| 2.3.3 Conformation of the molecules                     | 68        |
| 2.3.4 Molecular packing                                 | 74        |
| 2.3.5 Infrared Spectroscopic studies                    | 79        |
| 2.4. Conclusion                                         | 81        |
| 2.5. References                                         | 82        |

## **Chapter III** 85

### Crystal structure analysis of substituted hydroxy piperidine derivatives

|        |                                                   |     |
|--------|---------------------------------------------------|-----|
| 3.1    | Introduction                                      | 85  |
| 3.2.   | Experimental details                              | 87  |
| 3.2.1  | Procedure for synthesis of piperidine derivatives | 87  |
| 3.2.2  | X-ray crystallography                             | 88  |
| 3.3.   | Results and Discussion                            | 92  |
| 3.3.1. | The main connectivity                             | 114 |
| 3.3.2  | The phenyl ring                                   | 117 |
| 3.3.3  | Conformation of the molecules                     | 118 |
| 3.3.4  | Molecular packing                                 | 123 |
| 3.4.   | Conclusion                                        | 128 |
| 3.5.   | References                                        | 129 |

## **Chapter IV** 132

### Crystal structure analysis of two oxazolidinone derivatives

|        |                                                      |     |
|--------|------------------------------------------------------|-----|
| 4.1    | Introduction                                         | 132 |
| 4.2.   | Experimental details                                 | 134 |
| 4.2.1  | Procedure for synthesis of oxazolidinone derivatives | 134 |
| 4.2.2  | X-ray crystallography                                | 135 |
| 4.3.   | Results and Discussion                               | 138 |
| 4.3.1. | The main Chain                                       | 151 |
| 4.3.2  | The phenyl ring                                      | 152 |
| 4.3.3  | Conformation of the molecules                        | 153 |
| 4.3.4  | Molecular packing                                    | 156 |
| 4.4.   | Conclusion                                           | 161 |
| 4.5.   | References                                           | 162 |

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| <b>Chapter V</b>                                                                                 | 164 |
| Crystal structure of <i>N</i> -sodio, <i>N</i> -bromo- <i>p</i> -toluene sulfonamide             |     |
| 5.1 Introduction                                                                                 | 164 |
| 5.2 Experimental details                                                                         | 165 |
| 5.2.1 Procedure for synthesis of <i>N</i> -sodio, <i>N</i> -bromo- <i>p</i> -toluene sulfonamide | 165 |
| 5.2.2 X-ray crystallography                                                                      | 166 |
| 5.3 Results and Discussion                                                                       | 170 |
| 5.3.1 Molecular packing                                                                          | 181 |
| 5.3.2 Infrared Spectroscopic studies                                                             | 184 |
| 5.4 Conclusion                                                                                   | 185 |
| 5.5 References                                                                                   | 186 |
