Appendices

I. The Program Listings for Optimization from Simulated Data
   a. Product formation in two-step reactions
   b. Co-product formation in two-step reactions
   c. Intermediate concentration in two-step reactions
   d. Product formation in three-step reactions
   e. System property data in two-step reactions

II. The Program Listings for Optimization from Real Data
   1. Product formation in two-step reactions
   2. Co-product formation in two-step reactions
   3. System property data in two-step reactions

III. Simulation Results
   a. Product formation in two-step reactions
   b. Co-product formation in two-step reactions
   c. Intermediate concentration in two-step reactions
   d. Product formation in three-step reactions
   e. System property data in two-step reactions

List of Figures

1. The time-dependence of the relative concentrations of the reactant, intermediate, product and co-product in a two-step, consecutive, first-order reaction
2. The error map for product formation data in a two-step, consecutive, first-order reaction
