ACKNOWLEDGEMENT

“A man would do nothing, if he waited until he could do it so well that no one find faults with what he has done”, says Cardinal Newman. These words were quoted by I.L. Finar in his book on Organic Chemistry. These words have given me courage to take up the research work on part-time basis. I thank the Almighty who has given me the strength and courage to do something rather than keeping quiet.

I wish to express my deep sense of gratitude and most sincere thanks to Dr. K. SRIDHARAN, MSc., M.Phil., Ph.D., Reader in Chemistry, National College, Trichirappalli – 1 for having suggested the topic of research and supervising for his invaluable discussions and constant encouragement during my endeavour to complete this research work successfully.

I am highly indebted to Shri. K. SANTHANAM, B.Com., F.C.A., Secretary, National College Council and Dr. N. Seshadri, M.A., M.Ed., Ph.D., Principal, National College, Trichirappalli for having permitted me to do Ph.D work and providing the facilities for my research work.
I am thankful for the encouragement given by Dr. K. Balasubramaninan, M.Sc., M. Phil., M. Ed., Ph. D., Reader and Head of the Department of Chemistry, National College, and Trichirappalli.

I am thankful to Prof M. Palaniandavar, Head, Dept. of Chemistry and Member, doctoral committee for his useful discussions and suggestions.

The validity of research work, I believe, lies in its application. The antifungal screening would have been an impossibility but for Dr. M.N. Abubaker, Reader in Botany, National College, Trichirappalli. He taught me the techniques and toiled with me for an year inspite of his busy schedule. Mere words are insufficient to express my gratitude to him. In this regard, I thank Dr. V.T. Sridharan, Head of the Department of Botany, National College, Trichirappalli for permitting me to work in the Department of Botany.

I am grateful to Prof. S. Thiagarajan, M.Sc., M. Phil., Former Principal, National College, Trichirappalli for his parental care and advices.

I owe my gratitude to Dr. S. Muthuswamy, M.Sc., Ph.D., Former Principal, National College, and Trichirappalli for his constant encouragement.
I wish to record my thankfulness to Dr. K. Vivekanandan, M.Sc., M. Phil., Ph.D., Reader in Chemistry, National College, Trichirappalli for his constructive suggestion and help rendered by him at every stage of my research work.

I take this opportunity to acknowledge my sincere thanks to Shri. T.M. Srinivasan, M.A., M.Ed., Correspondent, E.R. Higher Secondary School, Trichirappalli for permitting me to do my research work on part-time basis.

I thank Shri R. Raghunathan, Research Scholar, Department of Chemistry, for his timely help.

My thanks are due to the teaching and non-teaching staff, Department of Chemistry, Trichirappalli for their kind cooperation.

I whole heartedly thank the RSIC, I.I.T., Bombay and Madras for the IR, uv-vis., RSIC, CDRI Lucknow, for C,H,N analyses and USIC, Madurai Kamaraj University, Madurai for IR, Super Colour Photos, Trichy for the nice plates, Jothi Laser Printers for their neat typing work.

I thank my parents for their blessings. I thank my wife who stood by me during the period of my research work. Finally I thank, my relatives and friends who took part in this endeavour in some form or other.

V.RAMAKRISHNAN.
