ACKNOWLEDGEMENT

The present work could not have been successfully completed without the cooperation and assistance extended by many learned persons and friends at different stages. It becomes my moral duty to express my gratitude to all these individuals.

At the very outset, I owe a great debt of gratitude to my supervisor Dr. Mohammad Izhar Hassan, Reader, Department of Geography, M. D. University Rohtak for his tireless guidance and constant encouragement. His constructive criticism and thought provoking comments have left their imprints upon each and every aspect of the present study.

I also express my sincere gratitude to Dr. (Mrs.) Nina Singh, Professor and Head, Department of Geography, M. D. University, Rohtak for her cooperation and encouragement.

My sincere thanks are also due to the other faculty members of the Department of Geography, M. D. University, Rohtak for their kind suggestions and cooperation.

I also put on record my gratitude to the departmental library staff, laboratory staff and official staff for their cooperation and necessary assistance.

I am also thankful to many officials of the Statistical Department of Punjab and Haryana, Chandigarh, Soil Department, H.A.U. Hisar, Haryana State Remote Sensing Centre Hisar, Central Soil Salinity Research Institute, Kamal, Central Ground Water Board Chandigarh,
Agricultural Department Haryana, Panchkula and Ground water Cell, Agriculture Department, Haryana, Panchkula for providing me the necessary documents and data.

I would also like to thank the farmers and patwari of Juan village for their cooperation in collection of various scheduled primary and secondary data related to rice cropping in the village.

I am highly grateful to my colleagues and friends who helped me directly or indirectly at the various stages of the research work.

I am personally grateful to Sh. Hawa Singh Chikkara for his encouragement and advice while I was busy conducting primary survey in Juan village. Without his assistance collection of data would have become very difficult.

I owe my gratitude to various authors whose works have been consulted and quoted in the present research work.

I am extremely thankful to S.S. Computers for typing work and Mastak Computers for the cartographic work.

Finally, I must convey my deepest appreciation to my parents and my wife, Priyanka, for their keen sense of understanding. I must not forget to mention my affection towards my son Ritic Raj (Nonu) who has badly missed me throughout the thesis work.

However, I shall alone be responsible for the shortcomings that still persist in the study.

November, 2005
