List of Figures                              i
List of Tables                               ii
List of Screenshots                          iii

1. Introduction                             1
   1.1 Motivation                             1
   1.2 A Fuzzy Neural ITS for the WWW         3
      1.2.1 ANFIS Based Student Model          5
      1.2.2 Fuzzy FSM Based Tutor Modeling     5
      1.2.3 XML Based Domain Modeling          6
      1.2.4 Adaptive Courseware & Testware Generation 7
   1.3 Rationale for Fuzzy Neural Approach    7
   1.4 Organization of the Dissertation       9

2. Literature Review                         12
   2.1 Fuzzy Neural Modeling                  12
      2.1.1 Fuzzy Logic                       13
      2.1.2 Artificial Neural Networks & Fuzzy Systems 14
      2.1.3 A Fuzzy Inference System          16
      2.1.4 Feedforward Neural Networks & Fuzzy Inference System 18
   2.2 Web-based Intelligent Tutoring Systems 23
   2.3 A Generic Architecture of a Web-based ITS 25
   2.4 Current Research in Web-based ITS      27
   2.5 Learning Theories                      31
      2.5.1 Situated Learning                  31
      2.5.2 Constructivistc Theory             32
      2.5.3 Information Processing Theory      33
      2.5.4 Behavioristic Theory               34
      2.5.5 Cognitivistc Theory                35
      2.5.6 Learning Theories & Instructional Design 35
2.6 Summary and Discussion 37
  2.6.1 Problems with current Web-based ITS 37
  2.6.2 The Proposed Approach to Remedy the Problems 40

3. Student Modeling 43
  3.1 Introduction 43
  3.2 Related work in Student Modeling 44
  3.3 Review of ANFIS 46
  3.4 ANFIS-based Student Modeling 49
    3.4.1 Student Model Overview 49
    3.4.2 ANFIS Student Model Design and Training 49
    3.4.3 Student Model Validation and Testing 51
  3.5 Summary and Discussion 58
    3.5.1 Evaluation of the Model 58

4. Tutor Modeling 61
  4.1 Introduction 61
    4.1.1 Low-Level Issues 62
    4.1.2 Meta-Strategy Selection 63
  4.2 Conventional Teaching-Learning Process & the Related Issues 65
    4.2.1 Adaptation Based on Content 68
    4.2.2 Adaptation Based on Sequence 68
  4.3 Related Work in Tutor Modeling 71
  4.4 Fuzzy Finite State Machine 72
    4.4.1 Introduction 72
    4.4.2 Operation of Fuzzy State Automata 73
  4.5 Fuzzy FSM for Tutor Modeling 77
  4.6 Implementation and Testing 81
  4.7 Summary and Discussion 88

5. Domain Modeling 91
  5.1 Introduction 91
  5.2 Framework of Domain Model 93
  5.3 Related Work 95
  5.4 Review of XML 99
  5.5 XML Based Domain Modeling 101
    5.5.1 Efficacy-based Content Classification 102
5.5.2 A Three-layer Domain Model 104
5.5.3 The Domain Modeling Language 107
5.6 Domain Model Implementation 112
5.7 Summary and Discussion 115

6. Adaptive Courseware Generation 117
6.1 Introduction 117
6.2 Related Work 119
6.3 Adaptive Courseware Generation 121
6.4 The Lesson Aggregation Module 122
   6.4.1 ANFIS-based Lesson Aggregation 125
6.5 Adaptive Testware Generation 131
   6.5.1 Review of Bloom’s Taxonomy 131
   6.5.2 Adaptive Testware Generation 135
   6.5.3 MCQs Based on Bloom’s Taxonomy 137
6.6 Summary and Discussion 141

7. FUN-WITS: A Fuzzy Neural Web-based Intelligent Tutoring System 144
7.1 Introduction 144
7.2 The FUN-WITS 147
   7.2.1 Student Module 149
   7.2.2 Domain Module 149
   7.2.3 Tutor Module 150
   7.2.4 Lesson Generation Module 150
   7.2.5 Interface Module 151
7.3 Model Testing and Evaluation 151
7.4 Summary and Discussion 158

8. Conclusion 159
8.1 Summary 159
8.2 ANFIS-based Student Model 160
8.3 Fuzzy FSM based Tutor Modeling 160
8.4 XML-based Domain Modeling 161
8.5 Adaptive Courseware Generation 161
8.6 A System-Oriented Approach 162
8.7 Future Scope 162
8.8 Epilogue 163
